INDEX

ABDOU, N. I. *See* Richter, M., 70
Acetylcholine receptor in electroplax (O'Brien *et al.*), 438
Acetyl-α-chymotrypsin and monoisonitrosoacetone (Wedler *et al.*), 1120
Actinomycin D and human chromosomes (Miles), 585
Active transport model, analysis of (Hill), 409
Adenosine monophosphate: and stalk cell differentiation (Bonner), 110; and renal gluconeogenesis (Nagata and Rasmussen), 368; and thyrocalcitonin, in rat kidney and bone (Murad *et al.*), 446; formation of, in cerebral cortex (Shimizu *et al.*), 1033
Adenyl cyclase: inhibition of, by phenothiazines (Wolff and Jones), 454; and hormone binding (Lefkowitz *et al.*), 745
Adenylyltransferase, reversible reaction of (Mantel and Holzer), 660
Aleurone of barley, nitrate reductase activity in (Ferrari and Varner), 729
ALLER, L. H. The [NeIV] Lines in High Excitation Gaseous Nebulae, 775
Alloantigens, *H-2*, peptides of (Shimada *et al.*), 691
Amino acid uptake in mammalian kidney (Baerlocher *et al.*), 1009
Amnesia from transcranial electric shocks (Lee-Teng), 857
Amylase and protein synthesis, control of (Grand and Gross), 1081
Amytal, reaction site of (Gutman *et al.*), 763
Analytic continuation of zeta-functions on group (Gelbart), 14
Anemia, congenital Heinz body hemolytic (Jacob and Winterhalter), 697
ANGELETTI, P. U., and R. LEVI-MONTALCINI. Sympathetic Nerve Cell Destruction in Newborn Mammals by 6-Hydroxydopamine, 114
ANGELETTI, R. H. Nerve Growth Factor from Cobra Venom, 668
Antibiotic resistance markers, genetic mapping of (Goldthwaite *et al.*), 96
Antibodies, γG-, and phage f2 (Dudley *et al.*), 88
Antibody-ferritin conjugates, specific staining with (McLean and Singer), 122
Antigen-reactive cell and transplant rejection (Richter *et al.*), 70
Antigens: viral, in cytoplasm of infected cells (Ishibashi), 304; cell surface (Aoki *et al.*), 569; mouse H-2, peptides of (Shimada *et al.*), 691; virus-specific nonvirion, in HSV-infected cells (Tarro and Sabin), 753
ANTOINE, A. D. *See* Nason, A., 137
AOKI, T., E. A. BOYSE, L. J. OLD, E. DE HARVEN, U. HÄMMERLING, and H. A. WOOD. G (Gross) and H-2 Cell Surface Antigens: Location on Gross Leukemia Cells by Electron Microscopy with Visually Labeled Antibody, 569
APPLIED MATHEMATICAL SCIENCES. *See* Table of Contents, p. iv
APPLIED PHYSICAL SCIENCES. *See* Table of Contents, p. iv
Aspartate transcarbamylase, subunits of (Meighen *et al.*), 234
ASTRONOMY. *See* Table of Contents, p. iii
ATKINS, J. F., and J. C. LOPER. Transcription Initiation in the Histidine Operon of *Salmonella typhimurium*, 925
Auxin and plant cell elongation (Rayle *et al.*), 184
Avian adenovirus mutants (Ishibashi), 304
AXELROD, J. *See* Thoenen, H., 58
Azotobacter vinelandii, nitrogenaseless mutants of (Sorger and Trofimenkoff), 74

Bacillus licheniformis (Sargent and Lampen), 962
Bacillus subtilis: antibiotic resistance in (Goldthwaite *et al.*), 96; temperature-sensitive mutant of (Yoshikawa), 206
BACKUS, G. Inference from Inadequate and Inaccurate Data, I, 1
———. Inference from Inadequate and Inaccurate Data, II, 281
Bacterial chromosome and prophage λ in lysogenic cells (Freifelder and Meselson), 200
Bacteriophage. *See* Phage
BAERLOCHER, K. E., C. R. SCRIVER, and F. MOHYUDDIN. Ontogeny of Iminoglycine Transport in Mammalian Kidney, 1009
BAKAY, B. *See* Nyhan, W. L., 214
BARBOUR, S. D., and A. J. CLARK. Biochemical and Genetic Studies of Recombination Proficiency in *Escherichia coli*, I. Enzymatic Activity Associated with *recB*$^+$ and *recC*$^+$ Genes, 955
Barley, nitrate reductase activity in (Ferrari and Varner), 729
Base pairs and coenzymes, models for (Iwamura *et al.*), 1025
BASERGA, R. *See* Rovera, G., 876
BAXTER, J. D., and G. M. TOMKINS. The Relationship between Glucocorticoid Binding and Tyrosine Aminotransferase Induction in Hepatoma Tissue Culture Cells, 709
BEARDSLEY, K., and C. R. CANTOR. Studies of Transfer RNA Tertiary Structure by Singlet-Singlet Energy Transfer, 39
Behavior: and RNA metabolism in goldfish brain (Shashoua), 160; and changes in brain macromolecules (Kahan *et al.*), 300
BEINERT, H. *See* Gutman, M., 763

CONTENTS

NATIONAL ACADEMY OF SCIENCES

SYMPOSIUM ON CHEMICAL AND BIOLOGICAL WARFARE 250
FOREWORD . . . . . *Matthew S. Meselson, Chairman* 250
INTERNATIONAL LEGAL HISTORY AND PRESENT STATUS . . . . *George Bunn* 253
POLITICAL CONSIDERATIONS AND ANALYSIS OF MILITARY REQUIREMENTS FOR CHEMICAL AND BIOLOGICAL WEAPONS . . . . . *Han Swyter* 261
SIGNIFICANCE OF CHEMICAL AND BIOLOGICAL WARFARE FOR THE PEOPLE . . . . . *Ivan L. Bennett, Jr.* 271
INFORMATION TO CONTRIBUTORS i

PHYSICAL SCIENCES

MATHEMATICS

A SETTING FOR A THEOREM OF BOTT . . . *By Marston Morse and Stewart S. Cairns* 8
NONCOMMUTATIVE JORDAN ALGEBRAS WITH COMMUTATORS SATISFYING AN ALTERNATIVITY CONDITION . . . . . *By Richard E. Block* 10
FOURIER ANALYSIS ON $GL(n,\mathbf{R})$ . . . . . *By Stephen S. Gelbart* 14
HIGHER DIMENSIONAL MAPPINGS FOR WHICH THE AREA FORMULA HOLDS . . . . . *By Casper Goffman and William P. Ziemer* 491
A DIFFERENTIAL EQUATION FOR AN EISENSTEIN SERIES OF GENUS TWO . . . . . *By H. L. Resnikoff* 495
REPORT ON THE TEICHMÜLLER METRIC . . . . . *By H. L. Royden* 497
MIXTURES AND CHARACTERISTIC FUNCTION . . . . . *By Witold Klonecki* 831
SIMPLIFYING INTERSECTIONS ON SURFACES . . . *By H. C. Griffith and O. G. Harrold* 837

ASTRONOMY

THE [NeIV] LINES IN HIGH EXCITATION GASEOUS NEBULAE . *By Lawrence H. Aller* 775

PHYSICS

BISCALAR AND BIVECTOR GREEN'S FUNCTIONS IN DESITTER SPACE TIME . . . . . *By J. V. Narlikar* 483
DYNAMICS OF SYSTEMS WITH LARGE NUMBER OF DEGREES OF FREEDOM AND GENERALIZED TRANSFORMATION THEORY . . . *By I. Prigogine, C. George, and F. Henin* 789

CHEMISTRY

NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY: ^{13}C SPECTRA OF SOME COMMON NUCLEOTIDES . . . . . *By Douglas E. Dorman and John D. Roberts* 19
CARBON-13 NUCLEAR MAGNETIC RESONANCE: NATURALLY OCCURRING NUCLEOTIDES . *By Alan J. Jones, Michael W. Winkley, David M. Grant, and Roland K. Robins* 27
SPIN DELOCALIZATION IN RETINALS . . . *By Dinshaw J. Patel and R. G. Shulman* 31
STUDIES OF TRANSFER RNA TERTIARY STRUCTURE BY SINGLET-SINGLET ENERGY TRANSFER . . . . . *By Kenneth Beardsley and Charles R. Cantor* 39
KINETICS OF HETEROGENEOUS CHEMICAL REACTIONS, II . . . . . *By S. H. Lin and Henry Eyring* 47
NATURAL-ABUNDANCE ^{13}C NUCLEAR MAGNETIC RESONANCE SPECTRA OF TERPENES AND CAROTENES . . *By Manfred Jautelat, John B. Grutzner, and John D. Roberts* 288
THE CONFORMATION OF CHOLINERGIC MOLECULES AT NICOTINIC NERVE RECEPTORS . . . . . *By Cyrus Chothia and Peter Pauling* 477
(ERRATUM, 64, 1329):—RELATIVE DIFFUSIVITIES OF METHANE IN WATER AND CARBON TETRACHLORIDE . . . . . *By Joel H. Hildebrand* 771

(Erratum. 64, 1331).—Thermodynamic Parameters for Dissolved Gases . . . . . *By Joel H. Hildebrand* 771
Proton Magnetic Resonance Study of Ferredoxin from *Clostridium pasteurianum* . . . . . *By M. Poe, W. D. Phillips, C. C. McDonald, and W. Lovenberg* 797
Biotin-Bound CO_2 and the Mechanism of Enzymatic Carboxylation Reactions . . . . . *By Thomas C. Bruice and A. F. Hegarty* 805
Helix Probability Profiles of Denatured Proteins and Their Correlation with Native Structures. . . . . *By P. N. Lewis, N. Gō, M. Gō, D. Kotelchuck, and H. A. Scheraga* 810
The Anomalous Deuterium Isotope Effect on the Chemical Shift of the Bridge Hydrogen in the Enol Tautomer of 2,4-Pentanedione . . . . . *By Sunney I. Chan, L. Lin, Dale Clutter, and Phoebe Dea* 816
Failure of Energy Transfer between Identical Aromatic Molecules on Excitation at the Long Wave Edge of the Absorption Spectrum. . . . . *By Gregorio Weber and Meir Shinitzky* 823

GEOLOGY

Oxygen-Collagen Priority and the Early Metazoan Fossil Record . . . . . *By Kenneth M. Towe* 781

GEOPHYSICS

Inference from Inadequate and Inaccurate Data, I. . . . *By George Backus* 1
Inference from Inadequate and Inaccurate Data, II . . . *By George Backus* 281

APPLIED PHYSICAL AND MATHEMATICAL SCIENCES

Light Pulse Propagation in Nonlinear Dispersive Medium . . . . . *By B. W. Knight and G. A. Peterson* 841
Differential Scatter of Left and Right Circularly Polarized Light by Optically Active Particulate Systems . . . . . *By D. W. Urry and J. Krivacic* 845

BIOLOGICAL SCIENCES

BOTANY

Phytochrome-Mediated Repression of Enzyme Synthesis (Lipoxygenase): A Threshold Phenomenon . . . *By H. Oelze-Karow, P. Schopfer, and H. Mohr* 51
Entry of Organic Acid Anions into Roots . . . . . *By P. C. Jackson, J. M. Taylor, and S. B. Hendricks* 176
Action of Auxin on Cell Elongation . . . . . *By David L. Rayle, Michael L. Evans, and Rainer Hertel* 184

ZOOLOGY

Sympathetic Nerve Cell Destruction in Newborn Mammals by 6-Hydroxydopamine . . . . . *By P. U. Angeletti and R. Levi-Montalcini* 114
Circadian Systems, V. The Driving Oscillation and the Temporal Sequence of Development . . . . . *By Colin S. Pittendrigh and Steven D. Skopik* 500
Electrical Activity in the Spinal Cord of the Chick Embryo, *in situ* . . . . . *By R. R. Provine, S. C. Sharma, T. T. Sandel, and V. Hamburger* 508
Orientation by Untrained Pigeons Requires the Sun. . . . . *By William T. Keeton and Andre Gobert* 853

XUM

PHYSIOLOGY

PHASE DIFFERENCE IN THE INDUCTION OF TYROSINE HYDROXYLASE IN CELL BODY AND NERVE TERMINALS OF SYMPATHETIC NEURONES . . . . . *By Hans Thoenen, Robert A. Mueller, and Julius Axelrod* 58

A NEW APPROACH TO ELECTROMAGNETIC BLOOD FLOW DETERMINATION BY MEANS OF CATHETER IN AN EXTERNAL MAGNETIC FIELD . . . . . *By Alexander Kolin* 521

NERVE MEMBRANE EXCITATION WITHOUT THRESHOLD . . . . . *By Kenneth S. Cole, Rita Guttman, and Francisco Bezanilla* 884

PURKINJE CELLS IN THE CEREBELLUM: THEIR RESPONSES TO POSTURAL STIMULI IN CATS . . . . . *By Jerzy Konorski and Remigiusz Tarnecki* 892

BRAIN-CELL PROTEIN SYNTHESIS SPECIFICALLY RELATED TO LEARNING . . . . . *By H. Hydén and P. W. Lange* 898

SURFACE MOVEMENTS DURING THE GROWTH OF SINGLE EXPLANTED NEURONS . . . . . *By D. Bray* 905

MICROBIOLOGY

ENERGY COUPLING IN THE LACTOSE TRANSPORT SYSTEM OF *Escherichia coli* . . . . . *By P. T. S. Wong, E. R. Kashket, and T. H. Wilson* 63

CELLS INVOLVED IN CELL-MEDIATED AND TRANSPLANTATION IMMUNITY IN THE RABBIT, I. THE NONINVOLVEMENT OF THE BONE MARROW ANTIGEN-REACTIVE CELL IN THE TRANSPLANT REJECTION REACTION . . . . . *By Maxwell Richter, Nabih I. Abdou, and Robert D. Midgley* 70

NITROGENASELESS MUTANTS OF *Azotobacter vinelandii* . . . . . *By George J. Sorger and Diane Trofimenkoff* 74

TRANS-SPECIES RESCUE OF DEFECTIVE GENOMES OF MURINE SARCOMA VIRUS FROM HAMSTER TUMOR CELLS WITH HELPER FELINE LEUKEMIA VIRUS . . . . . *By Padman S. Sarma, T. Log, and Robert J. Huebner* 81

KINETICS OF NEUTRALIZATION OF BACTERIOPHAGE f2 BY RABBIT γG-ANTIBODIES . . . . . *By Mary A. Dwilley, Robert W. Henkens, and David T. Rowlands, Jr.* 88

GENETIC MAPPING OF ANTIBIOTIC RESISTANCE MARKERS IN *Bacillus subtilis* . . . . . *By C. Goldthwaite, D. Dubnau, and I. Smith* 96

MECHANISM OF ACTION OF 2-MERCAPTO-1(β-4-PYRIDETHYL)BENZIMIDAZOLE: A REVERSIBLE INHIBITOR OF INTERFERON ACTIVITY . . . . . *By Robert M. Friedman and Ira Pastan* 104

INDUCTION OF STALK CELL DIFFERENTIATION BY CYCLIC AMP IN THE CELLULAR SLIME MOLD *Dictyostelium discoideum* . . . . . *By John Tyler Bonner* 110

RETENTION OF VIRAL ANTIGEN IN THE CYTOPLASM OF CELLS INFECTED WITH TEMPERATURE-SENSITIVE MUTANTS OF AN AVIAN ADENOVIRUS . . . . . *By Masahide Ishibashi* 304

HAMSTER-TROPIC SARCOMAGENIC AND NONSARCOMAGENIC VIRUSES DERIVED FROM HAMSTER TUMORS INDUCED BY THE GROSS PSEUDOTYPE OF MOLONEY SARCOMA VIRUS. . . . . *By Gary Kelloff, Robert J. Huebner, Yong Ki Lee, Robert Toni, and Raymond Gilden* 310

IMMUNOGLOBULIN M: PENTAMERIC $Fc\mu$ FRAGMENTS RELEASED BY TRYPSIN AT HIGHER TEMPERATURES. . . . . *By Andrew G. Plaut and Thomas B. Tomasi, Jr.* 318

NEUTRALIZATION OF SENSITIZED VIRUS BY PURIFIED COMPONENTS OF COMPLEMENT . . . . . *By Charles A. Daniels, Tibor Borsos, Herbert J. Rapp, Ralph Snyderman, and Abner Louis Notkins* 528

ISOLATION OF DOUBLE LYSOGENS FROM 3T3 CELLS TRANSFORMED BY PLAQUE MORPHOLOGY MUTANTS OF SV40. . . . . *By D. R. Dubbs and Saul Kit* 536

A MUTANT OF *Escherichia coli* WITH TEMPERATURE-SENSITIVE STREPTOMYCIN PROTEIN . . . . . *By Soo-Sang Kang* 544

CELLULAR SITES OF IMMUNOLOGIC UNRESPONSIVENESS . . . . . *By Jacques M. Chiller, Gail S. Habicht, and William O. Weigle* 551

Absence of Disulfide Bonds Linking the Heavy and Light Chains, a Property of a Genetic Variant of γA2 Globulins . . . . . *By L. M. Jerry, H. G. Kunkel, and H. M. Grey* 557

Virus-Specific, Labile, Nonvirion Antigen in Herpesvirus-Infected Cells . . . . . *By Giulio Tarro and Albert B. Sabin* 753

(Erratum).—Genetic Mapping of Antibiotic Resistance Markers in *Bacillus subtilis* . . . . . *By C. Goldthwaite, D. Dubnau, and I. Smith* 771

Proteins Specified by Herpes Simplex Virus, III. Viruses Differing in Thier Effects on the Social Behavior of infected Cells Specify Different Membrane Glycoproteins *By John M. Keller, Patricia G. Spear, and Bernard Roizman* 865

PATHOLOGY

Renal Damage Associated with Silicon Compounds in Dogs . . . . . *By Paul M. Newberne and Robert B. Wilson* 872

Pulse Labeling of RNA of Mammalian Cells . . . . . *By Giovanni Rovera, Stephen Berman, and Renato Baserga* 876

PSYCHOLOGY

Instrumental Conditioning of the Rat Cardiac Control Systems . . . . . *By Craig Fields* 293

Brain Function and Macromolecules, VI. Autoradiographic Analysis of the Effect of a Brief Training Experience on the Incorporation of Uridine into Mouse Brain . . . . . *By Barry E. Kahan, Martin R. Krigman, John Eric Wilson, and Edward Glassman* 300

Effect of Rectangle Length on Velocity Thresholds for Real Movement . . . . . *By Barbara Mates and C. H. Graham* 516

Retrograde Amnesia Gradients by Subconvulsive and High Convulsive Transcranial Currents in Chicks . . . . . *By Evelyn Lee-Teng* 857

MEDICAL SCIENCES

The Separation, Physical Characterization, and Differentiation Kinetics of Spermatogonial Cells of the Mouse . . . . . *By D. M. K. Lam, R. Furrer, and W. R. Bruce* 192

Erythropoietic Activity of Steroid Metabolites in Mice . . . . . *By D. Gorshein and F. H. Gardner* 564

G(Gross) and H-2 Cell-Surface Antigens: Location on Gross Leukemia Cells by Electron Microscopy with Visually Labeled Antibody . . . . . *By Tadao Aoki, Edward A. Royse, Lloyd J. Old, Etienne de Harven, Ulrich Hämmerling, and Harry A. Wood* 569

A Microsurgical Methodology for Human Cells *in vitro*: Evolution and Applications . . . . *By Elaine G. Diacumakos, Scott Holland, and Pauline Pecora* 911

Stimulation of Mammalian Erythropoiesis by 5β-H Steroid Metabolites . . *By Albert S. Gordon, Esmail D. Zanjani, Richard D. Levere, and Attallah Kappas* 919

GENETICS

Topological Relationship of Prophage λ to the Bacterial Chromosome in Lysogenic Cells. . . . . *By David Freifelder and Matthew Meselson* 200

Temperature-Sensitive Mutants of *Bacillus subtilis*, I. Multiforked Replication and Sequential Transfer of DNA by a Temperature-Sensitive Mutant . . . . . *By Hiroshi Yoshikawa* 206

Hemizygous Expression of Glucose-6-Phosphate Dehydrogenase in Erythrocytes of Heterozygotes for the Lesch-Nyhan Syndrome . . *By William L. Nyhan, Bohdan Bakay, James D. Connor, James F. Marks, and Doman K. Keele* 214

In vitro Malignant Transformation by Methylcholanthrene of the Progeny of Single Cells Derived From C3H Mouse Prostate . . . . . *By Sukdeb Mondal and Charles Heidelberger* 219

A Study on the Transcription of the Polyoma Viral Genome . . . . . *By J. Hudson, D. Goldstein, and R. Weil* 226

Village and Tribal Genetic Distances among American Indians, and the Possible Implications for Human Evolution . . . . . *By James V. Neel and Richard H. Ward* 323

Split-Operon Control of a Prophage Gene . . . . . *By L. Elizabeth Bertani* 331

Stable Haploid Cultured Cell Lines from Frog Embryos . . . . . *By Jerome J. Freed and Lisolotte Mezger-Freed* 337

The Mating Advantage of Rare Males in *Drosophila* . . . . *By Lee Ehrman* 345

Ribosomal RNA Homologies among Distantly Related Organisms . . . . . *By Arnold J. Bendich and Brian J. McCarthy* 349

Concerning the Influence of Integrated Episomes on Chromosomal Replication in *Escherichia coli* . . . . . *By Helen Eberle* 467

Hypoxanthine-Guanine Phosphoribosyltransferase Deficiency: Activity in Normal, Mutant, and Heterozygote-Cultured Human Skin Fibroblasts . . . . . *By Wilfred Y. Fujimoto and J. Edwin Seegmiller* 577

Labeling and Other Effects of Actinomycin D on Human Chromosomes . . . . . *By Charles P. Miles* 585

A Genetic Map of Non-Mendelian Genes in *Chlamydomonas* . . . . . *By Ruth Sager and Zenta Ramanis* 593

Origin and Direction of Replication of the Chromosome of *E. coli* B/r . . . . . *By Millicent Masters* 601

Evolution of the Transcription Unit of Ribosomal RNA . . . . . *By Robert P. Perry, Tsai-Ying Cheng, Jerome J. Freed, Jay R. Greenberg, Dawn E. Kelley, and Kenneth D. Tartof* 609

Mechanics of Frameshift Mutagenesis in Bacteriophage T4: Role of Chromosome Tips . . . . . *By Dona M. Lindstrom and John W. Drake* 617

Derepression of GDP-α-D-Mannose and UDP-Glucose Pyrophosphorylases by a Regulator Gene Mutation: Episomal Dominance in Partial Diploids . . . . . *By Michael M. Lieberman, Christine E. Buchanan, and Alvin Markovitz* 625

Stability of a Position-Effect Variegation in Normal and Transdetermined Larval Blastemas from *Drosophila melanogaster* . . . . . *By Ernst Hadorn, Robert Gsell, and Jack Schultz* 633

Secondary Structures of DNA . . . . . *By M. F. Wilkins, H. R. Wilson, and L. D. Hamilton* 761

(Erratum).—Evidence for Intergenic Complementation in Hybrid Cells Derived from Two Human Diploid Strains Each Carrying an X-Linked Mutation . . . . . *By Marcello Siniscalco, Harold P. Klinger, Harry Eagle, Hillary Koprowski, Winfred Y. Fujimoto, and J. Edwin Seegmiller* 771

Transciption Initiation in the Histidine Operon of *Salmonella typhimurium* . . . . . *By John F. Atkins and John C. Loper* 925

Implications of TL Phenotype Changes in an H-2-Loss Variant of a Transplanted H-2^b/H-2^a Leukemia . . . . . *By Edward A. Boyse, Elisabeth Stockert, Chika A. Iritani, and Lloyd J. Old* 933

Studies on Genetic Organization in Higher Organisms, II. Complementation and Fine Structure of the Maroon-like Locus of *Drosophila melanogaster* . . . . . *By Victoria G. Finnerty, Peter Duck, and Arthur Chovnick* 938

(Addendum).—Am (1), The First Genetic Marker of Human Immunoglobulin A . . . . . *By G. N. Vyas and H. H. Fudenberg* 1126

BIOCHEMISTRY

A General Method for the Specific Staining of Intracellular Antigens with Ferritin-Antibody Conjugates . . . . *By J. D. McLean and S. J. Singer* 122

Isolation of Microtubule Protein from Cultured Mouse Neuroblastoma Cells . . . . *By J. B. Olmsted, K. Carlson, R. Klebe, F. Ruddle, and Joel Rosenbaum* 129

Formation of Assimilatory Nitrate Reductase by *in vitro* Inter-Cistronic Complementation in *Neurospora crassa* . . . . . *By Alvin Nason, Alan D. Antoine, Paul A. Ketchum, William A. Frazier III, and David K. Lee* 137

Electron Spin Resonance Studies of Lipid-Protein Interaction in Human Serum Lipoproteins . . . . . *By A. M. Gotto, H. Kon, and M. E. Birnbaumer* 145

Changes in the Physical State of DNA during Replication in Regenerating Liver of the Rat . . . . . *By Henry Berger, Jr., and J. Logan Irvin* 152

RNA Metabolism in Goldfish Brain during Acquisition of New Behavioral Patterns . . . . . *By Victor E. Shashoua* 160

Selective Elimination of the Exonuclease Activity of the Deoxyribonucleic Acid Polymerase from *Escherichia coli* B by Limited Proteolysis . . . . . *By H. Klenow and I. Henningsen* 168

Hybridization of Native and Chemically Modified Enzymes, III. Catalytic Subunits of Aspartate Transcarbamylase . . . . . *By E. A. Meighen, V. Pigiet, and H. K. Schachman* 234

The Structural Gene for a T7 Endonuclease Essential for Phage DNA Synthesis . . *By Melvin S. Center, F. William Studier, and Charles C. Richardson* 242

A Specific Complex between a Restriction Endonuclease and Its DNA Substrate . . . . . *By Robert Yuan and Matthew Meselson* 357

On the Transfer of Information from Old to New Chains of DNA Duplexes in Phage Lambda: Destruction of Heterozygotes . . . . . *By V. E. A. Russo, Mary M. Stahl, and Franklin W. Stahl* 363

Parathyroid Hormone, 3′5′ AMP, CA^{++}, and Renal Gluconeogenesis . . . . . *By Naokazu Nagata and Howard Rasmussen* 368

Mechanism of Viral Carcinogenesis by DNA Mammalian Viruses, VII. Viral Genes Transcribed in Adenovirus Type 2 Infected and Transformed Cells . . . . . *By Kei Fujinaga and Maurice Green* 375

Effects of Glucose on Glycogen Synthetase, Phosphorylase, and Glycogen Deposition in the Perfused Rat Liver . . . . . *By H. Buschiazzo, J. H. Exton, and C. R. Park* 383

The Chain Growth Rate of T4 Lysozyme *in vitro* . . . . . *By James M. Wilhelm and Robert Haselkorn* 388

Nuclear Magnetic Resonance Studies of the Structure and Binding Sites of Enzymes, XI. Characterization of Selectively Deuterated Analogs of Staphylococcal Nuclease. . . *By I. Putter, J. L. Markley, and O. Jardetzky* 395

Polytropic Montage: Ribosomes Examined in a Tissue Section . . . . . *By Roger G. Hart and James M. Yoshiyama* 402

Analysis of a Model for Active Transport . . . . . *By Terrell L. Hill* 409

Decay of Fluorescence Emission Anisotropy of the Ethidium Bromide-DNA Complex Evidence for an Internal Motion in DNA . . . . . *By Ph. Wahl, J. Paoletti, and J.-B. Le Pecq* 417

Structural Studies on Reovirus: Discontinuities in the Genome . . . . . *By Stewart Millward and Angus F. Graham* 422

Peptide Chain Termination, VI. Purification and Site of Action of S . . . . . *By J. Goldstein, G. Milman, E. Scolnick, and T. Caskey* 430

A Muscarone-Binding Material in Electroplax and Its Relation to the Acetylcholine Receptor, II. Dialysis Assay . . . . . *By R. D. O'Brien, L. P. Gilmour, and M. E. Eldefrawi* 438

Effect of Thyrocalcitonin on Adenosine 3′:5′-Cyclic Phosphate Formation by Rat Kidney and Bone . . . . . *By Ferid Murad, H. Bryan Brewer, Jr., and Martha Vaughan* 446

Inhibition of Hormone-Sensitive Adenyl Cyclase by Phenothiazines . . . . . *By J. Wolff and Ann B. Jones* 454

Photohydration of Uridine in the RNA of Coliphage R17, II. Relationship between Ultraviolet Inactivation and Uridine Photohydration . . . . . *By J. F. Remsen, N. Miller, and P. A. Cerutti* 460

Luminescence and Binding Studies on $tRNA^{Phe}$ . . . . . *By J. Eisinger, B. Feuer, and T. Yamane* 638

Nuclear Magnetic Resonance Studies of the Structure and Binding Sites of Enzymes, XII. A Conformational Equilibrium in Staphylococcal Nuclease Involving a Histidine Residue. . . . . *By J. L. Markley, Myra N. Williams, and O. Jardetzky* 645

Terminal Cross-Linking of DNA Strands by an Enzyme System from *Escherichia coli* Infected with Bacteriophage T4 . . . . . *By Bernard Weiss.* 652

Reversibility of the ATP:Glutamine Synthetase Adenyltransferase Reaction . . . . . *By M. Mantel and H. Holzer* 660

Nerve Growth Factor from Cobra Venom . . . . . *By R. Hogue Angeletti* 668

Specific Nucleolar and Nucleoplasmic RNA Polymerases . . . . . *By Robert G. Roeder and William J. Rutter* 675

The Role of Phosphatidylglycerol in the Vectorial Phosphorylation of Sugar by Isolated Bacterial Membrane Preparations . . . . . *By L. S. Milner and H. R. Kaback* 683

Comparison of the Peptide Composition of Two Histocompatibility-2 Alloantigens . . . *By Akira Shimada, Kunio Yamane, and Stanley G. Nathenson* 691

Unstable Hemoglobins: The Role of Heme Loss in Heinz Body Formation. . . . . *By Harry Jacob and Kaspar Winterhalter* 697

Peptide Chain Termination, VII. The Ribosomal and Release Factor Requirements for Peptide Release . . . . . *By R. K. Tompkins, E. M. Scolnick, and C. T. Caskey* 702

The Relationship between Glucocorticoid Binding and Tyrosine Aminotransferase Induction in Hepatoma Tissue Culture Cells . . . . . *By John D. Baxter and Gordon M. Tomkins* 709

Isolation of a Cholinergic Proteolipid Receptor from Electric Tissue . . . . . *By José L. La Torre, Glenys S. Lunt, and E. De Robertis* 716

On the Interactions of Lipids and Proteins in the Red Blood Cell Membrane . . . . . *By Michael Glaser, Henry Simpkins, S. J. Singer, Michael Sheetz, and Sunney I. Chan* 721

Control of Nitrate Reductase Activity in Barley Aleurone Layers . . . . . *By T. E. Ferrari and J. E. Varner* 729

Selection and Characterization of an *E. coli* Mutant Defective in Membrane Lipid Biosynthesis . *By John E. Cronan, Jr., Tapas K. Ray, and P. Roy Vagelos* 737

ACTH Receptors in the Adrenal: Specific Binding of ACTH-^{125}I and Relation to Adenyl Cyclase . . . . . *By Robert J. Lefkowitz, Jesse Roth, William Pricer, and Ira Pastan* 745

Reaction Sites of Rotenone, Piericidin A, and Amytal in Relation to the Nonheme Iron Components of NADH Dehydrogenase . . . . . *By M. Gutman, Thomas P. Singer, Helmut Beinert, and John E. Casida* 763

(Erratum).—On the Role of DNA Synthesis in Avian Tumor Virus Infection . . . . . *By Peter H. Duesberg and Peter K. Vogt* 771

(Erratum).—Marek's Disease Herpes Virus: A Cytomegalovirus? . . . . . *By Lucy F. Lee, Bernard Roizman, Patricia G. Spear, Elliott D. Kieff, B. R. Burmester, and K. Nazerian* 771

Interconversion of Phospho- and Dephospho- Forms of Pig Heart Pyruvate Dehydrogenase . . . . . *By Otto Wieland and Elmar Siess* 947

Biochemical and Genetic Studies of Recombination Proficiency in *Escherichia coli*, I. Enzymatic Activity Associated with *recB*$^+$ and *recC*$^+$ Genes . . . . . *By Stephen D. Barbour and Alvin J. Clark* 955

A Mechanism for Penicillinase Secretion in *Bacillus licheniformis* . . . . . *By M. G. Sargent and J. O. Lampen* 962

Unified Theory for Gel Electrophoresis and Gel Filtration . . . . . *By David Rodbard and Andreas Chrambach* 970

Nicotinic Acid Metabolism, V. A Cobamide Coenzyme-Dependent Conversion of α-Methyleneglutaric Acid to Dimethylmaleic Acid . . . . . *By H. F. Kung, S. Cedarbaum, L. Tsai, and T. C. Stadtman* 978

Relative Effect of Transcription-Level and Translation-Level Control of Protein Synthesis during Early Development of the Sea Urchin . . . . . *By Stanley A. Terman* 985

Immunochemical Measurement of Double-Stranded RNA of Uninfected and Arbovirus-Infected Mammalian Cells . *By Victor Stollar and B. David Stollar* 993

Induction of Cytochromes in Human Cells by Oxygen . . *By Donald A. Pious* 1001

Ontogeny of Iminoglycine Transport in Mammalian Kidney . . . . . *By Kurt E. Baerlocher, Charles R. Scriver, and Fazl Mohyuddin* 1009

DNA Replication in Mammalian Cells, I. The Size of Newly Synthesized Helices . . . . . *By Fiorella Nuzzo, Agnese Brega, and Arturo Falaschi* 1017

Synthetic Spectroscopic Models Related to Coenzymes and Base Pairs, VII. Stacking Interactions in tRNA; the "Bend" at Dimethylguanosine . . . . . *By Hajime Iwamura, Nelson J. Leonard, and Josef Eisinger* 1025

Stimulated Formation of Adenosine 3′,5′-Cyclic Phosphate in Cerebral Cortex: Synergism between Electrical Activity and Biogenic Amines . . . . . *By Hirotoshi Shimizu, Cyrus R. Creveling, and John Daly* 1033

Deoxynucleotide-Polymerizing Enzymes of Calf Thymus Gland, IV. Inhibition of Terminal Deoxynucleotidyl Transferase by Metal Ligands . . . . . *By L. M. S. Chang and F. J. Bollum* 1041

Template Properties of Complementary Fractions of Denatured Microbial Deoxyribonucleic Acids . . . . . *By John D. Karkas, Rivka Rudner, and Erwin Chargaff* 1049

On the Prevalence of "Nonspecific" Binding at the Specific Binding Sites of Globular Proteins . . . . . *By A. N. Glazer* 1057

The Appearance and Disappearance of the Post-Transcriptional Repressor of Tyrosine Aminotransferase Synthesis during the HTC Cell Cycle . . . . . *By David W. Martin, Jr., and Gordon M. Tomkins* 1064

Cooperative Effects in Models of Steady-State Transport across Membranes, I . . . . . *By Terrell L. Hill and Yi-der Chen* 1069

Template Activity of Liver Chromatin Increased by *in vivo* Administration of Insulin . . . . . *By Carl R. Morgan and James Bonner* 1077

Translation-Level Control of Amylase and Protein Synthesis by Epinephrine . . . . . *By Richard J. Grand and Paul R. Gross* 1081

SV40-Specific RNA in the Nucleus and Polyribosomes of Transformed Cells . . . . . *By Uno Lindberg and J. E. Darnell* 1089

Formation of All Stable RNA Species in *Escherichia coli* by Posttranscriptional Modification . . . . . *By B. Pace, R. L. Peterson, and N. R. Pace* 1097

Models of Structure of the Envelope of Influenza Virus . . . . . *By John M. Tiffany and Herbert A. Blough* 1105

The Reductive Inactivation of UDPgalactose-4-Epimerase from Yeast and *E. coli* . . . *By Herman M. Kalckar, Alexander U. Bertland II, and Birgitte Bugge* 1113

Reaction of Acetyl-α-Chymotrypsin and Other Esters with an Ionizable Nucleophile, Monoisonitrosoacetone . . . . . *By F. C. Wedler, F. L. Killian, and M. L. Bender* 1120

(Errata).—Peptidyl Transfers in Gramicidin S Biosynthesis from Enzyme-Bound Thioester Intermediates . . . . . *By Wieland Gevers, Horst Kleinkauf, and Fritz Lipmann* 249

INDEX

Abundance, solar: Of gallium 983
Acetylaminofluorene: Modification of oligonucleotides with 488
Acetylcholine: Elevation of cyclic GMP in rat heart 398
Acetylene reduction assay: Determination of phosphorus availability in lakes with 1104
ACTH: Adenyl cyclase sensitivity and glucorticoid regulation 995
Actinomycin D: Hemolysin response in rabbits and 1036
Action: Feline, impedance changes across footpad and 1150
Activation: α-Chymotrypsin, active site of 249
Activation, behavioral: Of rats infused with norepinephrine 289
Active site *see* Enzymes: Active site
Activity, neural *see* Neural activity
Adenosine 3′:5′-cyclic phosphate *see* Cyclic AMP
Adenyl cyclase *see* Enzymes: Adenyl cyclase
Adenylylation: Enzymic, *E. coli* glutamine synthetase and 564
Adrenalectomy: Effect on puromycin suppression of memory 48
Adrenergic sites *see* Sites, adrenergic
Affinity columns: Specific separation of cells on 685
Age-specific selection 780
Aging: In dynamics of life 132
Amino acid transport *see* specific amino acid transport *and* Transport: Amino acid
Aminoacyl tRNA synthetase *see* Enzymes: Aminoacyl tRNA synthetase
Amyloid: Spectroscopic study of 1044
Antibodies
  Mice, electrophoretically homogeneous elicited in 433
  Structurally homogeneous, from antipneumococcal sera 959
Antidromic: Conduction through spinal motoneurons, early recovery of 622
Anoxia: Early recovery of antidromic conduction and 622
Association desolvation: α-Chymotrypsin, activation and 249
ATPase *see* Enzymes: ATPase
Automimicry: Theoretical investigation of 1059
Axon formation: Regulation of, by clonal lines of neural tumor 160
Axon growth
  From insect neurons in culture 32
  Roles of microfilaments and microtubule in 1206
Axonic insult: Spinal motoneurons, behavior during 626

Bacillus subtilis: Transcription of RNA from native and denatured DNA of 197
Bacteriophage
  Genetic evolution of, unrelated phages and 385
  Lambda, abortive infection of bacteria lysogenic for phage P2 587
  Lambda, regulation of repressor expression in 855
  φX174, resistance of DNA to exonucleolytic cleavage 646
  Replication and transcription, substrate selection for 539
  T1, transduction by 1083
  T4 capsid formation, conversion of precursor proteins during 1275
  T4, induction of an endonuclease by 716
  T4, suppression of chemical mutagenesis in 823
  T4, transcription of template in 181
Behavioral activation: Of rats infused with norepinephrine 289
Biological clock
  Deamidation of peptides as possible timer 753
  Photoregulation, a model for 850
Blood flow meter: Electromagnetic catheter 53
Bone marrow chromosomes: Changes in, after administration of 7,12-dimethylbenzanthracene 1228
Boraginaceae: A hummingbird-pollinated species of 917

Calcium
  Movements in isolated synaptic terminals, sodium and 664
  Protein precipitation by 807
  Rabbit myocardium, influx into 603
Cancer: In dynamics of life 132
Capsid: Bacteriophage T4, formation of peptides of 1275
Carbohydrate: Myeloma immunoglobulin light chains, attachment to 975
Carcinogenesis: 7,12 - dimethylbenzanthracene and 1228
Cat: Action and secretion in sweat glands 1150

Catabolite-insensitive pathways: *lac* promoter mutants, revertants of 773
Catabolite-sensitive genes: Mechanism of activation of 104
Catalysis
Enzymic, directional character of proton transfer in 874
Enzymic, a source for the special power of 445
Catheter, electromagnetic: Of minimal lateral dimensions 53
Cauchy problem: A singular abstract 269
Cell division: Control of, isolation of yeast mutants 352
Cells: Specific separation of 685
Cerebellar cortex: Neurogenesis and morphogenesis in 294
Cerebrosides: Krabbe's disease, enzymic deficiency in 302
Chick embryo: Isolated spinal cord of 40
Chimeric dogs: Inhibition of fibroblasts from 65
Chlamydomonas reinhardi: Cyclic changes in membrane of 174
Chromosome aberrations: Yanomama Indians, among the 920
Chromosome replication: Nalidixic acid and synchronous initiation of 365
Chromosomes
Bone marrow *see* Bone marrow chromosomes
Ring *see* Ring chromosomes
Time of pairing in *Locusta migratoria* 94
Circadian systems: photoperiodic time measurement 758
Cl III line: Interpretation of 1
Classes, characteristic: General relativity, applications to 265
Clock, biological *see* Biological clock
Coding *see* Genetic code
Collagen: Proline hydroxylase activity in cultured fibroblasts and 552
Competition experiments: *Tribolium*, outcome of 1112
Complementarity: *B. subtilis* DNA, and RNA transcripts of 863
Conformation
Of oligonucleotides, modified, properties of 488
Peptides, ovine prolactin and bovine growth hormone, similarity of 830
Protein, biological membranes and 793
Contraction, muscle: Mechanism of force generation in 1199
Control system: In activation of catabolite-sensitive pathways 104
Convex vector lattices: Locally, theory of a class of 275
Convulsions: L-methionine-*S*-sulfoximine and 500
Cooperative effects: In models of steady-state transport across membranes 189
Cortex, cerebellar *see* Cerebellar cortex
Crossing-over: Mechanism of 211
Cross-linked fibrin: A donor-acceptor unit from 472
Cross sections: Flows with 1154
Cyclic AMP
Binding of, to G factor 146
Receptor protein of *E. coli*, inducible enzymes and 480
Cyclic GMP: In rat heart, elevation of 398
Cytochalasin B:
Morphogenesis of oviduct and 904
Morphogenesis of salivary epithelium and 360
Cytochrome: Mitochondrial membranes, localization in 928
Cytochrome *b*: an energy-transducing form of 1175
Cytochrome P-450: Substrate binding and spin-state changes in 1157

Deamidation: Of peptides and proteins 753
Deaminooxytocin: Secondary structure of 111
Dendrites: Spinal motoneurons, early recovery of antidromic conduction through 622
Differentiation
Lack of, induced in cultured plant cells 25
Suppression of, in melanoma cells 72
Diffraction, x-ray *see* X-ray diffraction
7,12-Dimethylbenzanthracene: Changes in bone marrow chromosomes after administration of 1228
Dimethyl suberimidate *see* Suberimidate, dimethyl
Diurnal variation: Enzyme activity, a model for 850
Division, cell *see* Cell division
DNA
B. subtilis 197; complementarity of RNA transcripts of 863
Endonuclease, induced by T4 bacteriophage 716
Exonuclease associated with *M. luteus* DNA polymerase 595
Kinetoplastic, from *Trypanosoma mega* 419

DNA (*contd.*)
Native and denatured, transcription of 197
ϕX174, replicative form II, resistance to exonucleolytic cleavage of 646
Synthesis of premeiotic, in *Locusta migratoria* 94
DNA synthesis
Inhibition by lymphocytes of immunized guinea pigs 1119
Initiation of, in 3T3 cells 204
DNA synthesis-stimulating substances: In phytohemagglutinins 1306
Dodecyl sulfate: Binding to proteins at high binding ratios 1002
Drosophila: Patterned neural activity of 765
Dog, chimeric *see* Chimeric dogs
Dopamine-β-hydroxylase *see* Enzymes: Dopamine-β-hydroxylase

Electron microscopy: Of kinetoplastic DNA from *T. mega* 419
Electron transport systems: Biological 837
Endonuclease *see* Enzymes: Endonuclease
Energy transduction: Cytochrome *b* and 1175
Enzyme
Catalysis, directional character of proton transfer in 874
Reaction, temporal resolution of individual steps in 787
Enzymes
Active site, of α-chymotrypsin activation 249
Activity, a model for diurnal variation of 850
Adenyl cyclase, in rat fat cell membranes, glucocorticoid regulation of 995
Aldolase, conversion from vegetative to spore form of 844
Aminoacyl tRNA synthetase, effect of modification of substrate on 507
ATPase, from human red cell plasma membranes 936
ATPase, mammalian microtubular paracrystals and 411
Catalytic power, a source for 445
Collagen proline hydroxylase, effect of lactate on 552
DNA polymerase, an exonucleolytic activity associated with 595
DNA polymerase, genetically modified and chemical mutagenesis 823
DNA polymerase, resistance to exonucleolytic cleavage of ϕX174 DNA by 646
Enzymes (*contd.*)
Dopamine-β-hydroxylase, increase in activity of 453
Endonuclease, T4-induced 716
Galactocerebroside β-galactosidase, leucodystrophy and deficiency of 302
Glucose-6-phosphate dehydrogenase, *Neurospora* morphology and 515
Glutamine synthetase, *E. coli*, modification of 564
Glycogen phosphorylase, *N. crassa*, interconvertible forms in 459
Glycogen synthetase, yeast, two forms from 967
Inducible *see* Inducible enzymes
Isozyme patterns and sexual morphogenesis 882
Lactic dehydrogenase, membrane-bound, amino acid transport and 1008
Nitrate reductase, *Neurospora*, *in vitro* assembly of 1016
Phosphoglucomutase, *Neurospora* mutants of 638
RNA polymerase, *B. subtilis* mutant altered in 404
RNA polymerase, initiation and release of RNA by 701
RNA polymerase of vesicular stomatitis virus 572
RNA replicase and transcriptase, substrate selection by 539
Threonine deaminase, binding of leucyl-tRNA to 1027
Tyrosine aminotransferase, posttranscriptional control of synthesis 390
Epithelium: Salivary, effect of cytochalasin B on morphogenesis of 360
Erythrocyte: Membranes, ouabain-binding component from 936
Estrogen: RNA synthesis, role in induction of uterine protein synthesis by 693
Eutrophication: An assay for phosphorus availability in lakes 1104
Evolution: Of bacteriophages 385
Exonuclease *see* Enzymes: DNA polymerase

Factor: Essential for the formation of infectious Rous sarcoma virus 314
Fat cell: Membranes, ACTH sensitivity and glucocorticoids 995
Fibrin
A donor-acceptor unit from 472
Human, subunit structure of 738
Fibrinogen: Human, subunit structure of 738

Fibroblasts
Colony inhibition of, effect of lymphocytes and serum on 65
Cultured L-929, collagen proline hydroxylase activity of 552
From chimeric dogs 65
Flows: With cross sections 1154
Formylmethionyl tRNA: Modification of pyrimidine residues, effect of 507
Forsman response: Actinomycin D and 1036
Founder effects: Role in outcome of competition experiments 1112
Frog: Egg development, influence of spermine and low temperature on 630

Gallium: Solar abundance of 983
Gaseous nebulae: Cl III lines in 1
Gene
Poly-L-lysine, guinea pig, linkage with histocompatibility locus 322
Synthesis of immunoglobulins controlled by 337
Gene conversion patterns: In *Sordaria fimicola*, alteration of 1290
Gene multiplicity: Triplicate genes in hexaploid wheat 1136
Genes, activation of: Catabolite-sensitive 104
Genetic: Regulator element, mapping by somatic cell analysis 1220
Genetic code
Properties of modified oligonucleotides 488
Sequential translation of trinucleotides 1164
Genetic selection
Age-specific 780
Temporal phenotypic heterogeneity and 370
Genetic trait: Lp lipoprotein as 99
G factor
Alternative to, for release of tRNA from ribosomes 168
Binding of cyclic AMP to 146
Glial tumor cells: Synthesis of acid mucopolysaccharides by 495
Globoid cell leucodystrophy: Enzymic deficiency in 302
Glucocorticoid: ACTH sensitivity of adenyl cyclase, regulation by 995
Glucose transfer: Dolichol monophosphate glucose as intermediate 153
Glutamine synthetase *see* Enzymes: Glutamine synthetase
Glycogen: Accumulation, role of two forms of yeast synthetase in 967
Glycosphingolipids: Membrane, in cultured kidney cells and SV5 virus 57
Glycosylation: Viral membrane proteins, site of 730
Growth hormone: Bovine, conformational similarity with ovine prolactin 830
GTPase: Effect of binding of cyclic AMP to G factor on 146
Guanosine 3′:5′-cyclic phosphate *see* Cyclic GMP

Heart: Elevation of cyclic GMP in rat, acetylcholine and 398
Heme: Mossbauer effect and models of 1142
Hemoglobins: Spin-labeled, cooperative oxygen binding and 722
Hemolysin response: Rabbits, Actinomycin D and 1036
Histidine transport: Protein components involved in 1096
Histocompatibility antigens: Guinea pigs, gene linkages in 322
Hormones (peptide): Secondary structure of oxytocin 111
Human cells: SV40-transformed, somatic hybrids of 79
Hummingbird: As pollinator of a Boraginaceae species 917
Humoral immunity *see* Immunity
Hydrogen exchange: Oxidized RNase as protein model and 1067

Immune response: Genetic control of, in guinea pigs 1267
Immunity: Transplantation and cell-mediated, cells involved in 1127
Immunoassay: Vasopressin, in man 1298
Immunoglobulins
Free ribosomes of a mouse plasma cell tumor, synthesis by 425
G and M, control of synthesis of 337
Heavy chains, a variable region subclass of 657
Interchain disulfide linkages, order of synthesis of 987
Light chains, myeloma, attachment of carbohydrate to 975
M: Hemolysin response and Actinomycin D 1136
Multiple gene theories of synthesis of 558
Synthesis of, polyribosomes and 1183
Synthesis of, sites of incorporation of sugars into 952
Immunological alteration: Leukemic cells, antitumor drug and 1089

Indians, Yanomama: Chromosome aberrations among 920
Inducible enzymes: Cyclic AMP receptor protein and 480
Initiation
Of DNA synthesis in 3T3 cells, conditions for 204
Of protein chains in rabbit reticulocytes 1282
Of RNA synthesis by DNA-dependent polymerase 701
Insect: Neurons from, axonal growth from cultured 32
Insulin: Posttranscriptional control of tyrosine aminotransferase synthesis by 390
Integrals: Singular, and the principal series 13
Interconvertible enzyme forms: *N. crassa* phosphorylase in 459
Interferon: Inhibition of leukemia cell multiplication by 1052
Internal irradiation: Death from 132
Iodine: Mossbauer effect and heme models 1142
Ion transport
Rabbit myocardium, influx of calcium into 603
Synaptic terminals, calcium movements in 664
Iron: Intracellular localization, and mitosis 1244
Irradiation, internal: Death from 132
Isoelectric focusing: Proteins, a new approach to 898
Isozymes: Patterns of, and sexual morphogenesis in *Schizophyllum commune* 882

Kidney cells: Glycosphingolipids from plasma membranes of 57
Kinetoplastic DNA: From *Trypanosoma mega* 419
Krabbe's disease: Enzymic deficiency in 302

lac operon: Promoter, catabolite-insensitive revertants of 773
Lactate: Collagen proline hydroxylase activity, effect on 552
L-cells: Temperature-sensitive mutants, isolation of 377
Learning: Single trial, of automimicry 1059
Lebesgue spaces: A class of locally convex vector lattices, inclusion in 275
Leucodystrophy, globoid cell: Enzymic deficiency in 302
Leukemia
Cells, antitumor drug and immunological alteration of 1089
Cells, mouse, inhibition of multiplication by interferon 1052
Mouse myeloma cells, viruses associated with 344
Virus, lack of necessity for transformation by sarcoma virus 1236
Levorphanol: Tolerance to, in mouse brain 944
Life
Dynamics of 672
Steady-state theory of mutation rates and dynamics of 441
Lipid–protein interactions: Membrane structure and 433
Lipoprotein, beta: Human serum, subunit heterogeneity of 1075
Lipoproteins: Lp *see* Lp lipoprotein
Liver metabolism: Role of dolichol monophosphate glucose in 153
Lp lipoprotein: As quantitative genetic trait 99
Lymph node cells: Synthesis and secretion of gamma-globulin by 987
Lymphocytes
As inhibitors of DNA synthesis 1119
Effects on inhibition of fibroblasts from chimeric dogs 65
Lysogenic bacteria: Phage P2, abortive infection with phage lambda 587

Malignancy: Suppression of, in melanoma cells 72
Mapping: Of a human genetic regulator element 1220
Melanoma cells: Melanotic, suppression of malignancy and differentiation in 72
Membranes
Amino acid transport and lactic dehydrogenase in 1008
ATPase and ouabain-binding component from 936
Bacterial, β-galactosidase transport in 1190
Biological, optical activity and protein conformation 793
Biological, state of proteins in 1002
Components of histidine transport in 1096
Ion transport across, simulation of 607
Mitochondrial, localization of cytochrome in 928
Plasma *see* Plasma membranes
Proteins, viral 730, 799

Membranes (*contd.*)
Rat fat cell, ACTH sensitivity of 995
Structure *see* Membrane structure
Thylakoid *see* Thylakoid membranes
Membrane structure
Microsomal, lipid–protein interactions in 433
Mycoplasma, spin-labeling and freeze etching of 909
Protein crystal model for 615
Membrane transport: Oscillating phase transition in 189
Memory: Effect of puromycin on suppression of 48
Memory trace: Adrenergic sites and 310
Metastable levels: In nebular plasmas, excitation of 282
Methionine sulfoximine: L-isomer of, as convulsant 500
Microfilaments
Morphogenesis of oviduct and 904
Role in axon growth 1206
Microtubular paracrystals: ATPase activity of 411
Microtubules: Role in axon growth 1206
Minicells: Segregation of functional sex factor into 815
Mitochondria
Energy-coupling mechanisms in 1175
From precursor, conversion into 1252
Membranes, localization of cytochrome in 928
Respiratory control, retention of *in vitro* 869
Ribosomes of *see* Mitochondrial ribosomes
Topological and functional organization of 125
Mitochondrial ribosomes
Isolation of, from *Xenopus laevis* 117
Subunit structure of 117
Mitosis: Intracellular localization of iron and 1244
Models: Of steady-state transport across membranes 189
Morphogenesis
Cerebellar cortex, neurogenesis and 294
Estrogen-induced glands of oviduct and cytochalasin B 904
Isozyme patterns and, in *Schizophyllum* 882
Of salivary epithelium, effect of cytochalasin B on 360
Morphology
Neurospora, glucose-6-phosphate dehydrogenase and 515
Morphology (*contd.*)
Relation of Neurospora phosphoglucomutase to 638
Spore, *B. subtilis* mutant altered in 404
Mossbauer effect: Studies with heme models and 1142
Mouse cells: Somatic hybrids with SV40-transformed human cells 79
Mouse tumor: Transformation by sarcoma virus 1236
Mucopolysaccharides, acid: Synthesis of, by glial tumor cells 495
Multiple gene theories: Of immunoglobulin synthesis, protein sequences and 558
Murine sarcoma virus: Thymosin and resistance to 1170
Muscle, striated: Molecular mechanism of force generation in 1199
Mutagenesis
Chemical, suppression of, in bacteriophage T4 823
Nitrosoguanidine, effect on SV40 virus 745
Mutants, temperature-sensitive: L-cells, isolation of 377
Mutation rates: Dynamics of life and steady-state theory of 441
Mycoplasma laidlawii: Membrane structure of 909
Myeloma: Immunoglobulin light chains, attachment of carbohydrate to 975
Myeloma cells: Mouse, leukemia viruses associated with 344
Myocardium: Rabbit, calcium influx into 603

Nalidixic acid: Chromosome replication and 365
Narcotics, opioid: Mouse brain, cellular tolerance to 944
Nebulae, gaseous *see* Gaseous nebulae
Nebular plasmas: Excitation of metastable levels in 282
Nerve tumor *see* Neural tumor
Neural activity: Patterned, of a *Drosophila* mutant 765
Neural tumor: Clonal lines of, regulation of axon formation by 160
Neurogenesis: Cerebellar cortex, morphogenesis and 294
Neurons
Insect, axonal growth from cultured 32
Spinal, behavior during axonic insult 626
Spinal, early recovery of antidromic conduction through dendrites of 622

Neurospora
Glycogen phosphorylase, interconvertible forms in *N. crassa* 459
Morphology and glucose-6-phosphate dehydrogenase *N. crassa* mutant 515
Nitrate reductase, *in vitro* assembly of, in *N. crassa* mutant 1016
Phosphoglucomutase mutants of *N. sitophila* 638
Nitrosoguanidine: Inactivating and mutagenic effects of 745
Norepinephrine: Behavioral activation of rats and 289
Nuclei, transplanted: Frog eggs, influence of spermine on 630
Nucleotides: Modified with *N*-2-acetylaminofluorene, coding of 488

Oligonucleotides
Binding to ribosomes, studies on 523
Conformation of, modified 488
Opioid narcotics: Mouse brain, cellular tolerance to 944
Optical activity: Congo red dichroism and extrinsic Cotton effect of 1044
Orbital steering: Catalytic power of enzymes, a source for 445
Oscillating phase transition: In steady-state transport 189
Ouabain: Purification of binding component from red cell membranes 936
Oviduct: Cytochalasin B and morphogenesis of 904
Oxygen: Binding to hemoglobin, nature of 722
Oxytocin: Secondary structure of cyclic moiety in 111

Papain, modified: Antibodies to, elicited in mice 433
Paracrystals, microtubular: ATPase activity of 411
Particle: Physical, representation and generalized transformation theory 709
Pectinophora gossypiella: Photoperiodic time measurement in 758
Phage *see* Bacteriophage
Phenotypic heterogeneity: As a substrate for selection 370
Phosphorus: Availability in lakes, an assay for 1104
Photochromic reagents: Photoregulation of biological activity by 850
Photoperiodic: Circadian systems, time measurement in 758
Photoregulation: Of biological activity by photochromic reagents 850
Phytohemagglutinin: Fractionation of 1306
Plant cells: Viruslike particles in nuclei of cultured 25
Plasma membranes: Glycosphingolipids of 57
Plasmas, nebular: Excitation of metastable levels in 282
PLL gene *see* Gene, poly-L-lysine
Plutonium-239: Internal irradiation from 132
Pneumococcus: Structurally homogeneous antibodies from antisera to 959
Pollination: Of Boraginaceae species, by a hummingbird 917
Polygene character: And genetic selection 87
Poly-L-lysine gene: Immune response of guinea pigs and 322, 1267
Positronium: Lyman α-radiation, search for 6
Positrons: Stopped in inert gases, Lyman α-radiation from 6
Postsynaptic potential: Excitatory, during axonic insult 626
Potassium: Ion transport in nerve, simulation of 607
Proinsulin: Preliminary x-ray diffraction studies of 1213
Prolactin: Ovine, conformational similarity of 830
Proline hydroxylase: From L-929 fibroblasts, effect of lactate on 552
Promitochondria: Conversion into respiring mitochondria 1252
Promoter: Mutants, catabolite-insensitive revertants of 773
Protease: Sporulation-specific, bacterial aldolase and 844
Protein–lipid interactions: Membrane structure and 433
Proteins
Bacteriophage T4 capsid, formation of 1275
Binding of dodecyl sulfate to 1002
Biosynthesis of *see* Protein synthesis
Conformation *see* Conformation: Protein
Fractionation, isoelectric focusing and 898
Immunoglobulins, a variable region subclass of 657
Precipitation by vinblastine and calcium ions 807
Structure of *see* Protein structure

Proteins (*contd.*)
Subunits *see* Subunits: Protein
Synthesis of *see* Protein synthesis
Viral membrane, characterization of 799
Viral membrane, site of glycosylation of 730
Protein structure
Cross-linking reagent and 615
Oxidized RNase as a model of 1067
Subunit heterogeneity in human serum beta lipoprotein 1075
X-ray diffraction study of proinsulin 1215
Protein synthesis
Antibodies, electrophoretically homogeneous elicited in mice 433
Chain initiation in rabbit reticulocytes 1282
Effect of binding of cyclic AMP to G factor on 146
Fibrin, a donor-acceptor unit from cross-linked 472
Formation of vaccinia virus structural protein from a precursor 677
Heavy-chain disease protein sequences and immunoglobulin synthesis 558
Herpesvirus, in cells infected with 799
Immunoglobulin heavy chains, control of 337
Immunoglobulin, sites of incorporation of sugars 952
Immunoglobulins, by free ribosomes of a mouse tumor 425
Interchain disulfide linkages of immunoglobulins, order of synthesis of 987
Sequential translation of trinucleotide codons 1164
Tyrosine aminotransferase, posttranscriptional control of synthesis 390
Uterine, role of RNA synthesis in the estrogen induction of 693
Proton transfer: Enzyme catalysis, directional character of 874
Protozoan membranes *see Chlamydomonas reinhardi*
Puromycin: Effect of, on memory 48
Pyrimidines: Aminoacyl synthetase recognition, effect of modification on 507

Rabbit reticulocytes *see* Reticulocytes, rabbit
Radium-226: Internal irradiation from 132
Receptor protein: For cyclic AMP, inducible enzymes and 480
Regulator: Human, mapping by somatic cell genetic analysis 1220
Relativity: Characteristic classes and Weyl tensor, applications to 265
Release of tRNA from ribosomes: Factor other than G in 168
Reovirus: Subviral particles of, RNA transcriptase in 890
Replication: Synchronous, of *E. coli* chromosome 365
Replicative form: ϕX174, resistance of DNA to cleavage 646
Repression: Threonine deaminase, leucyl-tRNA and 1027
Repressor: Lambda, regulation of expression in 855
Reproduction: Yeast, control of cell division cycle in 352
Respiratory control: Mitochondrial, retention of *in vitro* 869
Reticulocytes, rabbit: Protein chain initiation in 1282
Ribosomal subunits: Oligonucleotide binding to ribosomes and 523
Ribosomes
Binding of phenylalanyl-oligonucleotides to 523
Free, immunoglobulin synthesis by 425
Mitochondrial *see* Mitochondrial ribosomes
Release of tRNA from 168
Rifampicin: Formation of vaccinia virus structural protein, inhibition by 677
Ring chromosomes: Vesting in 211
RNA
B. subtilis, complementarity of transcripts from DNA of 863
Complementarity to *B. subtilis* DNA 197
Release of, after synthesis 701
Structure of 197
Structure of, in satellite tobacco necrosis virus 140
Synthesis *see* RNA synthesis
Transfer *see* Transfer RNA
RNA polymerase *see* Enzymes: RNA polymerase
RNase V: Effect of binding of cyclic AMP to G factor on 146
RNA synthesis
Initiation of 701
Substrates, requirements for selection of 539
Polymerase, in vesicular stomatitis virus 572
RNA transcriptase: Properties of, in reovirus subviral particles 890
Rous sarcoma virus: Essential cell-associated factor for formation of 314

Salivary epithelium *see* Epithelium, salivary
Sarcoma virus
Murine, thymosin and resistance to 1170
Transformation of cells without leukemia virus 1236
Schizophyllum commune: Isozymes and sexual morphogenesis in 882
Secretion
Feline, impedance changes across footpad and 1150
Gammaglobulin, by lymph node cells 987
Immunoglobulin, sites of incorporation of sugars 952
Segregation: Minicells, of functional sex factor into 815
Selection (genetic): Polygenic character and 87
Series: Principal, and singular integrals 13
Sex factor: Segregation of 815
Simian virus 5, 40 *see* SV5, SV40
Singular abstract Cauchy problem 269
Site, active *see* Enzymes: Active site
Sites, adrenergic: Evidence for involvement in the memory trace 310
Sodium: Calcium movements, effect on 664
Solar abundance: Of gallium 983
Somatic cell: Mapping of human regulator element by genetic analysis of 1220
Somatic hybrids: Loss of T-antigen from 79
Sordaria fimicola: Alteration of gene conversion patterns in 1290
Spectroscopy: Scattering effects and protein conformation 793
Spermine: Influence on normal development of frog eggs 630
Spinal cord: Isolated, of chick embryo 40
Spin-labeled hemoglobins: Oxygen binding and 722
Spin-state change: Cytochrome P-450, substrate binding and 1157
Spore: Morphology, *B. subtilis* mutant altered in 404
Sporulation: Conversion of bacterial aldolase and 844
Statistical theories: Of success 18
Steady-state transport: Across membranes 189
Striated muscle *see* Muscle, striated
Structure, membrane *see* Membrane structure
Structure: Secondary, of oxytocin and deamino-oxytocin 111
Suberimidate, dimethyl: Use as a protein cross-linking agent 651
Subunits
Human fibrin, fibrinogen, and cross-linked, structure of 738
Protein, cross-linking reagent and study of 651
Protein, *in vitro* assembly into nitrate reductase 1016
Ribosomal *see* Ribosomal subunits
Structure of mitochondrial ribosomal 117
Subviral particles: Of reovirus, RNA transcriptase in 890
Success: Statistical theories of 18
Sugars: Immunoglobulins, sites of incorporation of 952
Sulfoximine, methionine *see* Methionine sulfoximine
SV5: Plasma membrane glycosphingolipids from 57
SV40-transformed human cells: Somatic hybrids with mouse cells 79
Sweat glands: Impedance changes in cat in relation to 1150
Synaptic terminals: Movement of calcium in, sodium and 664

T-antigen: Loss of, from somatic hybrids 79
3T3 cells: Initiation of DNA synthesis in 204
Temperature: Low, enzyme reaction at 787
Temperature-sensitive mutants: L-cells, isolation of 377
Template transcription: "Delayed early" and "immediate early" in T4 181
Terminal sequence: Of satellite tobacco necrosis virus RNA 140
Termination: Sequential translation of trinucleotide for 1164
T4 *see* Bacteriophage T4
Thylakoid membranes: Cyclic changes of, in *Chlamydomonas reinhardi* 174
Thymosin: Acceleration of development of resistance to tumor by 1170
Tolerance: Levorphanol, in mouse brain 944
Transcriptase *see* RNA transcriptase
Transcription
Of a transfer RNA gene, *in vitro* 1260
Of T4 template 181
Transduction: By bacteriophage T1 1083
Transfer RNA
Binding to threonine deaminase and repression 1027
Modification, aminoacyl synthetase recognition and 507

Transfer RNA (*contd.*)
Release of, from ribosomes 168
Transcription of a gene for, *in vitro* 1260
Transformation: By sarcoma virus without leukemia virus 1236
Transformation theory: Generalized, physical particle representation and 709
Translation: *B. subtilis* DNA, complementarity of RNA transcripts of 863
Translocation: Sequential translation of trinucleotide for 1164
Transplantation immunity *see* Immunity
Transport
Amino acid, membrane-bound lactic dehydrogenase and 1008
β-galactosidase, in bacterial membrane preparations 1190
Histidine *see* Histidine transport
Tribolium: Outcome of competition experiments 1112
tRNA *see* Transfer RNA
Trypanosoma mega: Electron microscopy of DNA from 419
Tumor: Virus-induced, thymosin and resistance to 1170
Tumor cells: DNA synthesis inhibition by lymphocytes of guinea pig 1119
Tumor cells, glial: Synthesis of acid mucopolysaccharides by 495
Tumor, mouse *see* Mouse tumor
Tumor, mouse plasma cell: Synthesis of immunoglobulins by 425
Tumor, neural *see* Neural tumor

Unit activity: In isolated spinal cord 40
Uterine protein: Role of RNA synthesis in the estrogen induction of 693

Vasopressin: Human, immunoassay of 1298
Vector lattices: Locally convex, theory of a class of 275
Vesicular stomatitis virus: RNA polymerase in 572
Vesting: In ring chromosomes, and crossover 211
Vinblastine: Precipitation of proteins by 807
Viral RNA synthesis: Vesicular stomatitis virus, a polymerase in 572
Virus
Herpes, membrane proteins of 730, 799
Leukemia, association with myeloma cells 344
Rous sarcoma, essential cell-associated factor for formation of 314
Simian, inactivating and mutagenic effects of nitrosoguanidine on 745
Simian *see also* SV5, SV40
Vaccinia, formation of a structural polypeptide by 677
Viruslike particles: In nuclei of cultured plant cells 25

Weyl tensor: Characteristic classes and 265
Wheat: Triplicate genes for alcohol dehydrogenase in 1136

Xanthine: Oxidizing system of higher animals and enzymes of *Neurospora* mutant 1016
Xenopis laevis: Mitochondrial ribosomes from 117
X-ray diffraction: Studies of proinsulin 1213

Yanomama Indians: Chromosome aberrations among 920
Yeast: Conversion of promitochondria into mitochondria 1252
Yeasts: Control of cell division cycle in 352

Proceedings of the
National Academy of Sciences
of the United States of America

VOLUME 66
MAY-AUGUST 1970

INDEX TO AUTHORS OF ARTICLES (Volume 66) 1351
SUBJECT INDEX (Volume 66) 1355

PHYSICAL SCIENCES

ASTRONOMY

INTERPRETATION OF THE [CIIII] LINES IN GASEOUS NEBULAE . . . . . *By L. H. Aller, S. J. Czyzak, M. F. Walker, and T. K. Krueger* 1
EXCITATION OF METASTABLE LEVELS IN LOW DENSITY NEBULAR PLASMAS: [SII] AND [ArIV] . . . . . *By S. J. Czyzak, T. K. Krueger, and L. H. Aller* 282
THE SOLAR ABUNDANCE OF GALLIUM . . . . *By John Ross and Lawrence Aller* 983

CHEMISTRY

ACTIVE SITE OF α-CHYMOTRYPSIN ACTIVATION BY ASSOCIATION-DESOLVATION . . . . . *By Saul G. Cohen, Vishnu M. Vaidya, and Richard M. Schultz* 249
IS THE BREAKDOWN OF THE BORN-OPPENHEIMER APPROXIMATION RESPONSIBLE FOR INTERNAL CONVERSION IN LARGE MOLECULES? . . . . . *By D. M. Burland and G. W. Robinson* 257

MATHEMATICS

SINGULAR INTEGRALS AND THE PRINCIPAL SERIES, II . . . . . *By A. W. Knapp and E. M. Stein* 13
CHARACTERISTIC CLASSES AND WEYL TENSOR: APPLICATIONS TO GENERAL RELATIVITY . . . . . *By André Avez* 265
A SINGULAR ABSTRACT CAUCHY PROBLEM . . . . . *By J. A. Donaldson* 269
THEORY OF A CLASS OF LOCALLY CONVEX VECTOR LATTICES WHICH INCLUDE THE LEBESGUE SPACES . . . . . *By Witold M. Bogdanowicz* 275
FLOWS WITH CROSS SECTIONS . . . . . *By Alberto Verjovsky* 1154

APPLIED MATHEMATICAL SCIENCES

STATISTICAL THEORIES OF SUCCESS . . . . . *By Clarence Zener* 18

PHYSICS

SEARCH FOR POSITRONIUM LYMAN α-RADIATION FROM POSITRONS STOPPED IN INERT GASES . . . . . *By Marvin Leventhal* 6
PHYSICAL PARTICLE REPRESENTATION AND GENERALIZED TRANSFORMATION THEORY . . . . . *By I. Prigogine, Cl. George, F. Henin, P. Mandell, and J. W. Turner* 709

BIOLOGICAL SCIENCES

BIOCHEMISTRY

MECHANISM OF ACTIVATION OF CATABOLITE-SENSITIVE GENES: A POSITIVE CONTROL SYSTEM . . . . . *By Geoffrey Zubay, Daniele Schwartz, and Jon Beckwith* 104

SECONDARY STRUCTURE OF THE CYCLIC MOIETY OF THE PEPTIDE HORMONE OXYTOCIN AND ITS DEAMINO ANALOG . *By D. W. Urry, M. Ohnishi, and Roderich Walter* 111

THE MITOCHONDRIAL RIBOSOME OF *Xenopus laevis* . . . . . *By Ronald F. Swanson and Igor B. Dawid* 117

TOPOLOGICAL AND FUNCTIONAL ORGANIZATION OF THE MITOCHONDRION . . . . . *By Jennie M. Smoly, Bo Kuylenstierna, and Lars Ernster* 125

THE DYNAMICS OF LIFE, I. DEATH FROM INTERNAL IRRADIATION BY ^{239}PU AND ^{226}RA, AGING, CANCER, AND OTHER DISEASES . . *By Betsy J. Stover and Henry Eyring* 132

IDENTITY OF THE 5′-TERMINAL RNA NUCLEOTIDE SEQUENCE OF THE SATELLITE TOBACCO NECROSIS VIRUS AND ITS HELPER VIRUS: POSSIBLE ROLE OF THE 5′-TERMINUS IN THE RECOGNITION BY VIRUS-SPECIFIC RNA REPLICASE . . . . . *By J. A. Lesnaw and M. E. Reichmann* 140

BINDING OF ADENOSINE 3′:5′-CYCLIC PHOSPHATE TO G FACTOR OF *Escherichia coli*, AND ITS EFFECTS ON GTPASE, RNASE V, AND PROTEIN SYNTHESIS . . . . . *By Michihiko Kuwano and David Schlessinger* 146

DOLICHOL MONOPHOSPHATE GLUCOSE: AN INTERMEDIATE IN GLUCOSE TRANSFER IN LIVER. . . . . *By Nicolás H. Behrens and Luis F. Leloir* 153

REGULATION OF AXON FORMATION BY CLONAL LINES OF A NEURAL TUMOR . . . . . *By N. W. Seeds, A. G. Gilman, T. Amano, and M. W. Nirenberg* 160

RELEASE OF tRNA FROM RIBOSOMES BY A FACTOR OTHER THAN G FACTOR . . . . . *By Hideo Ishitsuka and Akira Kaji* 168

CYCLIC CHANGES IN THYLAKOID MEMBRANES OF SYNCHRONIZED *Chlamydomonas reinhardi* . . . . . *By Seth Schor, Philip Siekevitz, and George E. Palade* 174

TRANSCRIPTIONS OF THE BACTERIOPHAGE T4 TEMPLATE *In Vitro*: SEPARATION OF "DELAYED EARLY" FROM "IMMEDIATE EARLY" TRANSCRIPTION . . . . . *By Gabriele Milanesi, Edward N. Brody, Oscar Grau, and E. Peter Geiduschek* 181

COOPERATIVE EFFECTS IN MODELS OF STEADY-STATE TRANSPORT ACROSS MEMBRANES, II. OSCILLATING PHASE TRANSITION . . . *By Terrell L. Hill and Yi-der Chen* 189

COMPLEMENTARITY OF RNA PRODUCED BY ENZYMIC TRANSCRIPTION OF NATIVE AND DENATURED *B. subtilis* DNA . *By Era Cassuto, Marshall Stein, and Erwin Chargaff* 197

(ERRATUM, 62, 558).—THE ROLES OF SYNTHESIS AND DEGRADATION IN DETERMINING TISSUE CONCENTRATIONS OF LACTATE DEHYDROGENASE-5 . . . . . *By Paul J. Fritz, Elliot S. Vesell, E. Lucile White, and Kenneth M. Pruitt* 218

(ERRATUM, 64, 1103).—PHOTOREGULATION OF BIOLOGICAL ACTIVITY BY PHOTOCHROMIC REAGENTS, II. INHIBITORS OF ACETYLCHOLINESTERASE . . . . . *By Joseph Bieth, Spyros M. Vratsanos, Norbert Wassermann, and Bernard F. Erlanger* 218

POSTTRANSCRIPTIONAL CONTROL OF TYROSINE AMINOTRANSFERASE SYNTHESIS BY INSULIN . . . . . *By Thomas D. Gelehrter and Gordon M. Tomkins* 390

ELEVATION OF GUANOSINE 3′,5′-CYCLIC PHOSPHATE IN RAT HEART AFTER PERFUSION WITH ACETYLCHOLINE . . . . . *By W. J. George, J. B. Polson, A. G. O'Toole, and N. D. Goldberg* 398

Bacillus subtilis MUTANT ALTERED IN SPORE MORPHOLOGY AND IN RNA POLYMERASE ACTIVITY . *By Roy H. Doi, Lyle R. Brown, Gregory Rodgers, and Yao-pi Hsu* 404

ELECTROPHORETICALLY HOMOGENEOUS ANTI-DNP ANTIBODIES WITH RESTRICTED ISOELECTRIC POINTS ELICITED IN MICE BY IMMUNIZATION WITH THE ANTIGEN PAPAIN-S-DNPL . . . . . *By Gary N. Trump and S. J. Singer* 411

ELECTRON MICROSCOPY OF KINETOPLASTIC DNA FROM *Trypanosoma mega* . . . . . *By Monique Laurent and M. Steinert* 419

Synthesis of Immunoglobulin Heavy and Light Chains by the Free Ribosomes of a Mouse Plasma Cell Tumor . . . . . *By B. Lisowska-Bernstein, M. E. Lamm, and P. Vassalli* 425

Membrane Structure: Lipid-Protein Interactions in Microsomal Membranes . *By Benjamin F. Trump, Sue M. Duttera, William L. Byrne, and Antii U. Arstila* 433

The Dynamics of Life, II. The Steady-State Theory of Mutation Rates . . . . . *By Henry Eyring and Betsy J. Stover* 441

A Source for the Special Catalytic Power of Enzymes: Orbital Steering . . . . . *By Dan R. Storm and D. E. Koshland, Jr.* 445

Neurally Mediated Increase in Dopamine-β-Hydroxylase Activity . . . . *By Perry B. Molinoff, Steven Brimijoin, Richard Weinshilboum, and Julius Axelrod* 453

Interconvertible Forms of Glycogen Phosphorylase in *Neurospora crassa* . . . . . *By Marta T. Téllez-Iñón and Héctor N. Torres* 459

Rapid Purification and the Immunological Specificity of Mammalian Microtubular Paracrystals Possessing an ATPase Activity . . . . . *By Ariaki Nagayama and Samuel Dales* 464

Isolation, Characterization, and Location of a Donor-Acceptor Unit from Cross-Linked Fibrin . . . . . *By Renné Chen and Russell F. Doolittle* 472

Cyclic AMP Receptor Protein of *E. coli*: Its Role in the Synthesis of Inducible Enzymes . . . . . *By Michael Emmer, Benoit deCrombrugghe, Ira Pastan, and Robert Perlman* 480

Coding and Conformational Properties of Oligonucleotides Modified with the Carcinogen *N*-2-Acetylaminofluorene . . . . . *By Dezider Grunberger, James H. Nelson, Charles R. Cantor, and I. Bernard Weinstein* 488

Synthesis of Acid Mucopolysaccharides by Glial Tumor Cells in Tissue Culture . . . . . *By Albert Dorfman and Pei-Lee Ho* 495

Identification of L-Methionine-*S*-Sulfoximine as the Convulsant Isomer of Methionine Sulfoximine . . . . . *By W. Bruce Rowe and Alton Meister* 500

Structure and Function of *E. coli* Formylmethionyl tRNA, I. Effect of Modification of Pyrimidine Residues on Aminoacyl Synthetase Recognition . . . . . *By LaDonne H. Schulman* 507

Glucose-6-Phosphate Dehydrogenase and *Neurospora* Morphology . . . . . *By W. A. Scott and E. L. Tatum* 515

Studies on the Formation of Transfer Ribonucleic Acid-Ribosome Complexes, XII. Phenylalanyl-Oligonucleotide Binding to *E. coli* Ribosomes: Necessity for a Free Amino Group . . . . . *By Tokutaro Hishizawa, James L. Lessard, and Sidney Pestka* 523

13-Desmethyl Rhodopsin and 13-Desmethyl Isorhodopsin: Visual Pigment Analogues . . . . . *By Ralph Nelson, J. Kim deRiel, and Allen Kropf* 531

Qβ-Replicase and *E. coli* Transcriptase: Requirements for Substrate Selection as Revealed by a Study of Base Analogs . . . . . *By A. M. Kapuler and S. Spiegelman* 539

Studies of the Mechanism of Anthranilate Synthase Reaction . . . . . *By H. Tamir and P. R. Srinivasan* 547

Effect of Lactate on Collagen Proline Hydroxylase Activity in Cultured L-929 Fibroblasts . . . . *By John Paul Comstock and Sidney Udenfriend* 552

Implications of Heavy Chain Disease Protein Sequences for Multiple Gene Theories of Immunoglobulin Synthesis . *By William D. Terry and Jack Ohms* 558

Ability of Nonenzymic Nitration or Acetylation of *E. coli* Glutamine Synthetase to Produce Effects Analogous to Enzymic Adenylylation . . . . . *By Filiberto Cimino, Wayne B. Anderson, and E. R. Stadtman* 564

Ribonucleic Acid Synthesis of Vesicular Stomatitis Virus, II. An RNA Polymerase in the Virion . . . . . *By David Baltimore, Alice S. Huang, and Martha Stampfer* 572

Dinucleotides as Products of an Exonucleolytic Activity Associated with the *Micrococcus luteus* DNA Polymerase . . . . . *By S. J. Harwood, P. F. Schendel, L. K. Miller, and R. D. Wells* 595

Cooperative Effects in Models of Steady-State Transport across Membranes, III. Simulation of Potassium Ion Transport in Nerve . . . . . *By Terrell L. Hill and Yi-der Chen* 607

Biological Membrane Structure, I. The Protein Crystal Model for Membranes . . . . . *By Garret Vanderkooi and David E. Green* 615

Phosphoglucomutase Mutants of *Neurospira sitophola* and Their Relation to Morphology . . . . . *By N. C. Mishra and E. L. Tatum* 638

Replicative Form II DNA of ϕX174; Resistance to Exonucleolytic Cleavage by *E. coli* DNA Polymerase . . *By Aharon Razin and Robert L. Sinsheimer* 646

Use of Dimethyl Suberimidate, a Cross-Linking Reagent, in Studying the Subunit Structure of Oligomeric Proteins . . . . . *By Gregg E. Davies and George R. Stark* 651

The Dynamics of Life, III. Mechanisms of Nonsurvival and the Relation of Dose Size . . . . . *By Betsy J. Stover and Henry Eyring* 672

Formation of a Vaccinia Virus Structural Polypeptide from a Higher Molecular Weight Precursor: Inhibition by Rifampicin . . . . . *By Ehud Katz and Bernard Moss* 677

Role of RNA Synthesis in the Estrogen Induction of a Specific Uterine Protein . . . . . *By Anthony B. DeAngelo and Jack Gorski* 693

Initiation and Release of RNA by DNA-Dependent RNA Polymerase . . . . . *By Robert L. Millette and Carol D. Trotter* 701

A T4-Induced Endonuclease Which Attacks T4 DNA . . . . . *By Sidney Altman and Matthew Meselson* 716

Electron Paramagnetic Resonance Studies of Spin-Labeled Hemoglobins and Their Implications to the Nature of Cooperative Oxygen Binding to Hemoglobin . . . . . *By Chien Ho, Joseph J. Baldassare, and Samuel Charache* 722

Proteins Specified by Herpes Simplex Virus, IV. Site of Glycosylation and Accumulation of Viral Membrane Proteins . . . . . *By Patricia G. Spear and Bernard Roizman* 730

Subunit Structure of Human Fibrinogen, Soluble Fibrin, and Cross-Linked Insoluble Fibrin . . *By Patrick A. McKee, Patrick Mattock, and Robert L. Hill* 738

Controlled Deamidation of Peptides and Proteins: An Experimental Hazard and a Possible Biological Timer . . . . . *By Arthur B. Robinson, James H. McKerrow, and Paul Cary* 753

Temporal Resolution of Individual Steps in an Enzymic Reaction at Low Temperature . . . . . *By P. Douzou, R. Sireix, and F. Travers* 787

Optical Activity of Biological Membranes: Scattering Effects and Protein Conformation . . . . . *By Allan S. Schneider, Mary-Jane T. Schneider, and K. Rosenheck* 793

Precipitation of Proteins by Vinblastine and Calcium Ions. . . . . *By L. Wilson, J. Bryan, A. Ruby, and D. Mazia* 807

Conformational Similarity of Ovine Prolactin and Bovine Growth Hormone . . . . . *By S. M. Aloj and H. Edelhoch* 830

Biological Electron Transport Systems . . . . . *By Dwaine O. Cowan, Gavril Pasternak, and Frank Kaufman* 837

Conversion of Bacterial Aldolase from Vegetative to Spore Form by a Sporulation-Specific Protease . . . . . *By H. L. Sadoff, Emel Celikkol, and H. L. Engelbrecht* 844

Photoregulation of Biological Activity by Photochromic Reagents, IV. A Model for Diurnal Variation of Enzymic Activity . . . . . *By Joseph Bieth, Norbert Wassermann, Spyros M. Vratsanos, and Bernard F. Erlanger* 850

TRANSLATIONAL COMPLEMENTARITY OF RNA TRANSCRIPTS OF NATIVE AND DENATURED *B. subtilis* DNA . . . . . *By Era Cassuto and Erwin Chargaff* 863

DIRECTIONAL CHARACTER OF PROTON TRANSFER IN ENZYME CATALYSIS . . . . . *By Jui H. Wang* 874

PROPERTIES OF RNA TRANSCRIPTASE IN REOVIRUS SUBVIRAL PARTICLES . . . . . *By Daniel H. Levin, Naomi Mendelsohn, Michael Schonberg, Hanna Klett, Samuel Silverstein, Alan M. Kapuler, and George Acs* 890

A NEW APPROACH TO ISOELECTRIC FOCUSING AND FRACTIONATION OF PROTEINS IN A pH GRADIENT . . . . . *By Stephen J. Luner and Alexander Kolin* 898

MEMBRANE STRUCTURE: SPIN LABELING AND FREEZE ETCHING OF *Mycoplasma laidlawii* . . . . . *By Mark E. Tourtellotte, Daniel Branton, and Alec Keith* 909

LOCALIZATION OF CYTOCHROME IN INTACT AND FRAGMENTED MITOCHONDRIAL MEMBRANES . . . . . *By Britton Chance, M. Erecińska, and C. P. Lee* 928

IMMUNOGLOBULIN SYNTHESIS AND SECRETION, IV. SITES OF INCORPORATION OF SUGARS AS DETERMINED BY SUBCELLULAR FRACTIONATION . . . . . *By Jonathan W. Uhr and Isaac Schenkein* 952

ISOLATION AND CHARACTERIZATION OF STRUCTURALLY HOMOGENEOUS ANTIBODIES FROM ANTIPNEUMOCOCCAL SERA . . . . . *By Jean-Claude Jaton, Michael D. Waterfield, Michael N. Margolies, and Edgar Haber* 959

TWO FORMS OF YEAST GLYCOGEN SYNTHETASE AND THEIR ROLE IN GLYCOGEN ACCUMULATION . . . . . *By Lucia B. Rothman-Denes and Enrico Cabib* 967

ATTACHMENT OF CARBOHYDRATE TO THE VARIABLE REGION OF MYELOMA IMMUNOGLOBULIN LIGHT CHAINS . . . . . *By Harold C. Sox, Jr., and Leroy Hood* 975

SYNTHESIS AND SECRETION OF γ-GLOBULIN BY LYMPH NODE CELLS, VIII. ORDER OF SYNTHESIS OF THE INTERCHAIN DISULFIDE LINKAGES OF IMMUNOGLOBULINS . . . . . *By Earl W. Sutherland III, Daniel H. Zimmerman, and Milton Kern* 987

GLUCOCORTICOID REGULATION OF ACTH SENSITIVITY OF ADENYL CYCLASE IN RAT FAT CELL MEMBRANES . . . . . *By T. Braun and O. Hechter* 995

BINDING OF DODECYL SULFATE TO PROTEINS AT HIGH BINDING RATIOS. POSSIBLE IMPLICATIONS FOR THE STATE OF PROTEINS IN BIOLOGICAL MEMBRANES . . . . . *By Jacqueline A. Reynolds and Charles Tanford* 1002

THE RELATIONSHIP OF A MEMBRANE-BOUND D-(−)-LACTIC DEHYDROGENASE TO AMINO ACID TRANSPORT IN ISOLATED BACTERIAL MEMBRANE PREPARATIONS . . . . . *By H. R. Kaback and L. S. Milner* 1008

In Vitro ASSEMBLY OF *Neurospora* ASSIMILATORY NITRATE REDUCTASE FROM PROTEIN SUBUNITS OF A *Neurospora* MUTANT AND THE XANTHINE OXIDIZING OR ALDEHYDE OXIDASE SYSTEMS OF HIGHER ANIMALS . . . . . *By Paul A. Ketchum, Helene Y. Cambier, William A. Frazier III, Charles Madansky, and Alvin Nason* 1016

COMPONENTS OF HISTIDINE TRANSPORT: HISTIDINE-BINDING PROTEIN AND *hisP* PROTEIN . . . . . *By Giovanna Ferro-Luzzi Ames and Julia Lever* 1096

β-GALACTOSIDE TRANSPORT IN BACTERIAL MEMBRANE PREPARATIONS: ENERGY COUPLING VIA MEMBRANE-BOUND D-LACTIC DEHYDROGENASE . . . . . *By Eugene M. Barnes, Jr., and H. R. Kaback* 1190

ENERGY-COUPLING MECHANISMS IN MITOCHONDRIA: KINETIC, SPECTROSCOPIC, AND THERMODYNAMIC PROPERTIES OF AN ENERGY TRANSDUCING FORM OF CYTOCHROME *b* . . . . . *By B. Chance, D. F. Wilson, P. L. Dutton, and M. Erecińska* 1175

In Vitro TRANSCRIPTION OF A TRANSFER RNA GENE . . . . . *By Violet Daniel, Sara Sarid, Jacques S. Beckmann, and Uriel Z. Littauer* 1260

PROINSULIN: CRYSTALLIZATION AND PRELIMINARY X-RAY DIFFRACTION STUDIES . . . . . *By W. Wardle Fullerton, Reginald Potter, and Barbara W. Low* 1213

(ERRATUM, 64, 283) FRACTIONATION OF PHYTOHEMAGGLUTININ, I. PURIFICATION OF THE RNA AND DNA SYNTHESIS-STIMULATING SUBSTANCES AND EVIDENCE THAT THEY ARE NOT PROTEINS . *By M. L. Goldberg, W. Rosenau, and G. C. Burke* 1306

Specific Binding of Leucyl Transfer RNA to an Immature Form of L-Threonine Deaminase: Its Implications in Repression . . . . . *By G. Wesley Hatfield and R. O. Burns* 1027

Analysis of T4 Phage Proteins, I. Conversion of Precursor Proteins into Lower Molecular Weight Peptides during Normal Capsid Formation . . . . . *By Junko Hosoda and Ric Cone* 1275

Subunit Heterogeneity in Human Serum Beta Lipoprotein . . . . . *By J. P. Kane, E. G. Richards, and R. J. Havel* 1075

Application of ^{129}I Mossbauer Effect to Biological Systems: Studies with Heme Models . . . . . *By M. Pasternak, Peter G. Debrunner, G. DePasquali, Lowell P. Hager, and L. Yeoman* 1142

Promitochondria of Anaerobically Grown Yeast, IV. Conversion into Respiring Mitochondria . *By H. Plattner, M. M. Salpeter, J. Saltzgaber, and G. Schatz* 1252

Iron: Its Intracellular Localization and Possible Role in Cell Division . . . . . *By Elliott Robbins and Thoru Pederson* 1244

Immunoglobulin Synthesis and Secretion, V. Incorporation of Leucine and Glucosamine into Immunoglobulin on Free and Bound Polyribosomes . . . . . *By Charles J. Sherr and Jonathan W. Uhr* 1183

Sequential Translation of Trinucleotide Codons for Peptide Bond Formation, Translocation, and Termination . . . . . *By Richard K. Tompkins* 1164

Spin-State Changes in Cytochrome P-450_{cam} on Binding of Specific Substrates . . . . . *By R. Tsai, C. A. Yu, I. C. Gunsalus, J. Peisach, W. Blumberg, W. H. Orme-Johnson, and H. Beinert* 1157

Protein Chain Initiation in Rabbit Reticulocytes . . . . . *By David B. Wilson and Howard M. Dintzis* 1282

Oxidized RNase as a Protein Model Having No Contribution to the Hydrogen Exchange Rate from Conformational Restrictions . . . . . *By C. K. Woodward and Andreas Rosenberg* 1067

BOTANY

Viruslike Particles in Nuclei of Cultured Plant Cells Which Have Lost the Ability to Differentiate . . . . . *By R. D. Sjolund and C. Y. Shih* 25

(Erratum, 64, 287).—Quantitative Study of Clinal Variation in *Juniperus virginiana* Using Terpenoid Data . . . . . *By R. H. Flake, Ernst von Rudloff, and B. L. Turner* 218

Mitochondrial Longevity *In Vitro*: The Retention of Respiratory Control . . . . . *By Roger Romani and Anna Monadjem* 869

A Hummingbird-Pollinated Species of Boraginaceae in the Arizona Flora . . . . . *By Verne Grant and Karen A. Grant* 917

Alteration of Gene Conversion Patterns in *Sordaria fimicola* by Supplementation with DNA Bases . . . . . *By Y. Kitani and Lindsay S. Olive* 1290

Acetylene Reduction Assay for Determination of Phosphorus Availability in Wisconsin Lakes . *By W. D. P. Stewart, G. P. Fitzgerald, and R. H. Burris* 1104

GENETICS

Further Studies on Loss of T-Antigen from Somatic Hybrids between Mouse Cells and SV40-Transformed Human Cells. . . . . *By Mary C. Weiss* 79

Selection and Polygenic Characters . . . . . *By Montgomery Slatkin* 87

Premeiotic DNA Synthesis and the Time of Chromosome Pairing in *Locusta migratoria* . . . . . *By Peter B. Moens* 94

Studies of Lp-Lipoprotein as a Quantitative Genetic Trait. . . . . *By Nancy R. Harvie and Jane S. Schultz* 99

The Phenomenon of "Vesting" in Ring Chromosomes and Its Role in the Mutation Theory and Understanding of the Mechanism of Crossing-Over . . . . . *By N. P. Dubinin and L. S. Nemtsova* 211

Synchronous Reinitiation of Chromosome Replication in *E. coli* B/r after Nalidixic Acid Treatment . . *By C. B. Ward, M. W. Hane, and D. A. Glaser* 365

Temporal Phenotypic Heterogeneity as a Substrate for Selection . . . . . *By Harold W. Kerster and Donald A. Levin* 370

Isolation of Temperature-Sensitive Mutants of L-Cells . . . . *By L. H. Thompson, R. Mankovitz, R. M. Baker, J. E. Till, L. Siminovitch, and G. F. Whitmore* 377

Genetic Evolution of Bacteriophage, II. Physical Length of the Homologous Region in a Hybrid between Serologically and Morphologically Unrelated Phages . . . . . *By Hiroto Akiyoshi and Nobuto Yamamoto* 385

– (Erratum, 65, 200).—Topological Relationship of Prophage λ to the Bacterial Chromosome in Lysogenic Cells . *By David Freifelder and Matthew Meselson* 583

Bacteriophage Lambda: Abortive Infection of Bacteria Lysogenic for Phage P2 . *By Gunnar Lindahl, Gianpiero Sironi, Harvey Bialy, and Richard Calendar* 587

Age-Specific Selection . . . . *By Wyatt W. Anderson and Charles E. King* 780

Segregation of Functional Sex Factor into Minicells . . . . . *By Leon R. Kass and Michael B. Yarmolinsky* 815

Suppression of Chemical Mutagenesis in Bacteriophage T4 by Genetically Modified DNA Polymerases . . *By John W. Drake and Elaine O. Greening* 823

Regulation of Repressor Expression in λ . . . . . *By H. Eisen, P. Brachet, L. Pereira da Silva, and F. Jacob* 855

Isozyme Patterns and Sexual Morphogenesis in *Schizophyllum* . . . . . *By Chiu-Sheng Wang and John R. Raper* 882

Chromosome Aberrations among the Yanomama Indians . . . . *By Arthur D. Bloom, James V. Neel, Kyoo W. Choi, Shozo Iida, and Napoleon Chagnon* 920

Transduction by Bacteriophage T1 . . . . . *By Henry Drexler* 1083

Evidence for Triplicate Genes for Alcohol Dehydrogenase in Hexaploid Wheat . . . . . *By Gary E. Hart* 1136

(Erratum, 65, 226)—A Study on the Transcription of the Polyoma Viral Genome . . . . . *By J. Hudson, D. Goldstein, and R. Weil* 1306

Mapping of a Human Genetic Regulator Element by Somatic Cell Genetic Analysis. . . *By Robert J. Klebe, Tchaw-ren Chen, and Frank H. Ruddle* 1220

IMMUNOLOGY

A Variable Region Subclass of Heavy Chains Common to Immunoglobulins G, A, and M and Characterized by an Unblocked Amino-Terminal Residue . . . . . *By A. C. Wang, J. R. L. Pink, H. H. Fudenberg, and J. Ohms* 657

Specific Separation of Cells on Affinity Columns. . . . . *By Paolo Trucco-Bachi and Leon Wofsy* 685

Genetic Control of the Immune Response of Guinea Pigs to Limiting Doses of Bovine Serum Albumin: Relationship to the Poly-L-Lysine Gene . . . . . *By I. Green, J. K. Inman, and B. Benacerraf* 1267

Specific Inhibition of Tumor Cell DNA Synthesis *In Vitro* by Lymphocytes from Peritoneal Exudate of Immunized Syngeneic Guinea Pigs . . . . . *By Joost J. Oppenheim, Berton Zbar, and Herbert Rapp* 1119

Actinomycin D before and during Primary and Secondary Anti-Forssman Immunoglobulin Hemolysin Responses in Rabbits . . . . . *By William H. Taliaferro and Lucy Graves Taliaferro* 1036

Acceleration by Thymosin of the Development of Resistance to Murine Sarcoma Virus-Induced Tumor in Mice . . . . . *By Martin Zisblatt, Allen L. Goldstein, Frank Lilly, and Abraham White* 1170

MEDICAL SCIENCES

COLONY INHIBITION OF FIBROBLASTS FROM CHIMERIC DOGS MEDIATED BY THE DOGS' OWN LYMPHOCYTES AND SPECIFICALLY ABROGATED BY THEIR SERUM . . . . . *By I. Hellström, K. E. Hellström, R. Storb, and E. D. Thomas* 65

SUPPRESSION OF MALIGNANCY AND DIFFERENTIATION IN MELANOTIC MELANOMA CELLS . . . . . *By Selma Silagi and Sarah A. Bruce* 72

GLOBOID CELL LEUCODYSTROPHY (KRABBE'S DISEASE): DEFICIENCY OF GALACTOCEREBROSIDE β-GALACTOSIDASE . . . *By Kunihiko Suzuki and Yoshiyuki Suzuki* 302

TOLERANCE TO OPIOID NARCOTICS, II. CELLULAR TOLERANCE TO LEVORPHANOL IN MOUSE BRAIN . . . . . *By Judith A. Richter and Avram Goldstein* 944

IMMUNOLOGICAL ALTERATION OF LEUKEMIC CELLS *In Vivo* AFTER TREATMENT WITH AN ANTITUMOR DRUG . . . . . *By E. Bonmassar, A. Bonmassar, S. Vadlamudi, and A. Goldin* 1089

CHANGES IN CHROMOSOMES OF BONE MARROW AFTER INTRAVENOUS INJECTIONS OF 7,12-DIMETHYLBENZ(A)ANTHRACENE AND RELATED COMPOUNDS . . . . . *By E. Douglass Rees, S. K. Majumdar, and Amy Shuck* 1228

CELLS INVOLVED IN CELL-MEDIATED AND TRANSPLANTATION IMMUNITY, II. A CONSIDERATION OF THE FUNCTIONAL IDENTITY OF THE CELLS INVOLVED IN BOTH HUMORAL AND CELL MEDIATED IMMUNITY: A PHYLOGENETIC APPROACH . . . . . *By Maxwell Richter* 1127

IMMUNOASSAY OF PLASMA VASOPRESSIN IN MAN . . . . . *By Gary L. Robertson, Lester A. Klein, Jesse Roth, and Phillip Gorden* 1298

MICROBIOLOGY

GLUCOSPHINGOLIPIDS OF PLASMA MEMBRANES OF CULTURED CELLS AND AN ENVELOPED VIRUS (SV5) GROWN IN THESE CELLS . . . . . *By Hans-Dieter Klenk and Purnell W. Choppin* 57

A CELL-ASSOCIATED FACTOR ESSENTIAL FOR FORMATION OF AN INFECTIOUS FORM OF ROUS SARCOMA VIRUS . . . . *By H. Hanafusa, T. Miyamoto, and T. Hanafusa* 314

LINKAGE BETWEEN THE POLY-L-LYSINE GENE AND THE LOCUS CONTROLLING THE MAJOR HISTOCOMPATIBILITY ANTIGENS IN STRAIN 2 GUINEA PIGS . . . . . *By Leonard Ellman, Ira Green, William J. Martin, and Baruj Benacerraf* 322

DNA COMPLEMENTARY TO VIRAL RNA IN LEUKEMIC CELLS INDUCED BY AVIAN MYELOBLASTOSIS VIRUS . . . . . *By M. A. Baluda and D. P. Nayak* 329

EVIDENCE FOR CONTROL OF SYNTHESIS OF THE VARIABLE REGIONS OF THE HEAVY CHAINS OF IMMUNOGLOBULINS G AND M BY THE SAME GENE. . . . . *By A. C. Wang, S. K. Wilson, J. E. Hopper, H. H. Fudenberg, and A. Nisonoff* 337

LEUKEMIA VIRUSES ASSOCIATED WITH MOUSE MYELOMA CELLS . . . . . *By J. Watson, P. Ralph, S. Sarkar, and Melvin Cohn* 344

GENETIC CONTROL OF THE CELL-DIVISION CYCLE IN YEAST, I. DETECTION OF MUTANTS . . . . . *By Leland H. Hartwell, Joseph Culotti, and Brian Reid* 352

(ERRATUM, 65, 81).—TRANS-SPECIES OF DEFECTIVE GENOMES OF MURINE SARCOMA VIRUS FROM HAMSTER TUMOR CELLS WITH HELPER FELINE LEUKEMIA VIRUS . . . . . *By Padman S. Sarma, T. Log, and Robert J. Huebner* 583

INACTIVATING AND MUTAGENIC EFFECTS OF NITROSOGUANIDINE ON SIMIAN VIRUS 40 . . . . . *By Peter Tegtmeyer, Curt Dohan, Jr., and Catherine Reznikoff* 745

CATABOLITE-INSENSITIVE REVERTANTS OF *Lac* PROMOTER MUTANTS . . . . . *By Allen E. Silverstone, R. Rita Arditti, and Boris Magasanik* 773

SYNTHESIS OF PROTEINS IN CELLS INFECTED WITH HERPESVIRUS, VI. CHARACTERIZATION OF THE PROTEINS OF THE VIRAL MEMBRANE . . . . . *By Albert S. Kaplan and Tamar Ben-Porat* 799

Murine Sarcoma Virus Transformation of BALB/3T3 Cells: Lack of Dependence on Murine Leukemia Virus . . . . . *By Stuart A. Aaronson, John L. Jainchill, and George J. Todaro* 1236

Interferon and Cell Division, I. Inhibition of the Multiplication of Mouse Leukemia L 1210 Cells *In Vitro* by Interferon Preparations . . . *By Ion Gresser, Danièle Brouty-Boyé, Marie-Thérèse Thomas, and Alvaro Macieira-Coelho* 1052

PATHOLOGY

Congo Red Dichroism with Dispersed Amyloid Fibrils, an Extrinsic Cotton Effect . . . . . *By E. P. Bendtt, N. Eriksen, and C. Berglund* 1044

PHYSIOLOGY

Adrenalectomy and Suppression of Memory by Puromycin . . . . . *By Josefa B. Flexner and Louis B. Flexner* 48

An Electromagnetic Catheter Blood Flow Meter of Minimal Lateral Dimensions . . . . . *By Alexander Kolin* 53

Conditions Determining Initiation of DNA Synthesis . . . . . *By Renato Dulbecco and M. G. P. Stoker* 218

Behavioral Activation of Rats during Intraventricular Infusion of Norepinephrine. . . . . *By David S. Segal and Arnold J. Mandell* 289

Neurogenesis and Morphogenesis in the Cerebellar Cortex . . . . . *By J. C. Eccles* 294

Influx of Calcium into Rabbit Myocardium in Relation to Its Ionic Environment . . . . . *By Y. C. P. Lee and Maurice P. Visscher* 603

Early Recovery of Antidromic Conduction through Dendrites of Spinal Motoneurons in the Normal, Anoxic, and Postanoxic States. . . . . *By David P. C. Lloyd* 622

Excitatory Postsynaptic Potential and Monosynaptic Reflex Discharge of Spinal Motoneurons during Anoxic Insult. . . . *By David P. C. Lloyd* 626

Effect of Sodium Ions on Calcium Movements in Isolated Synaptic Terminals . . . . . *By M. P. Blaustein and W. P. Weismann* 664

Patterned Neural Activity of a Mutant *Drosophila melanogaster* . . . . . *By Kazuo Ikeda and William D. Kaplan* 765

Partial Purification of the Ouabain-Binding Component and of the Na,K-ATPase from Human Red Cell Plasma Membranes . . . . . *By Philip B. Dunham and Joseph F. Hoffman* 936

Impedance Changes Across the Footpad of the Cat in Relation to Action and Secretion in Sweat Glands . . . . . *By David P. C. Lloyd* 1150

The Molecular Mechanism of Force Generation in Striated Muscle . . . . . *By Leepo C. Yu, Robert M. Dowben, and Karl Kornacker* 1199

PSYCHOLOGY

Some Evidence for the Involvement of Adrenergic Sites in the Memory Trace . . . . . *By Richard B. Roberts, Josefa B. Flexner, and Louis B. Flexner* 310

Effects of Combined Frontal and Temporal Lesions on Learned Behaviors in Rhesus Monkeys . . . . . *By H. F. Harlow, K. A. Schiltz, A. J. Blomquist, and C. I. Thompson* 577

ZOOLOGY

Axonal Growth from Insect Neurons in Glia-Free Cultures . . . . . *By J. S. Chen and R. Levi-Montalcini* 32

Unit Activity in the Isolated Spinal Cord of Chick Embryo, *in Situ* . . . . . *By S. C. Sharma, R. R. Provine, V. Hamburger, and T. T. Sandel* 40

Effects of Cytochalasin B upon Microfilaments Involved in Morphogenesis of Salivary Epithelium . . *By Brian S. Spooner and Norman K. Wessells* 360

Influence of Spermine and Reduced Temperature on the Ability of Transplanted Nuclei to Promote Normal Development in Eggs of *Rana pipiens* . . . . . *By Sally Hennen* 630

Circadian Systems, VI. The Photoperiodic Time Measurement in *Pectinophora gossypiella* . . . . . *By Colin S. Pittendrigh, John H. Eichhorn, Dorothea H. Minis, and Victor G. Bruce* 758

Cytochalasin B: Effects upon Microfilaments Involved in Morphogenesis of Estrogen-Induced Glands of Oviduct . . . . . *By Joan T. Wrenn and Norman K. Wessells* 904

Theoretical Investigations of Automimicry, I. Single Trial Learning . . . . . *By Lincoln P. Brower, F. Harvey Pough, and H. R. Meck* 1059

A Further Assessment of the Role of Founder Effects in the Outcome of *Tribolium* Competition Experiments . . . . . *By Peter S. Dawson* 1112

Axon Growth: Roles of Microfilaments and Microtubules . . . . . *By Kenneth M. Yamada, Brian S. Spooner, and Norman K. Wessells* 1206
